1909 DEPARTMENT OF AGRICULTURE AND TECHNICAL INSTRUCTION FOR IRELAND.

REPORT

ON THE

TRADE IN IMPORTS AND EXPORTS

AT

IRISH PORTS

DURING THE YEAR ENDED

31ST DECEMBER, 1909.

Presented to both Houses of Parliament by Command of his Majesty.

DUBLIN:

PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE,
By CAHILL & Co., LTD., 40 LOWER ORMOND QUAY.

And to be purchased, either directly any Bookseller, from
E. PONSONBY, LTD., 116, GRAFTON-STREET DUBLIN; or
WYMAN AND SONS, LTD., FETTER-LANE, F. and
32 ABINGDON-STREET, WESTMINSTER, S.W.
OLIVER AND BOYD, TWEEDDALE-COURT, EDIN.

1910.

[Cd. 5354]. Price 11½d.

SALE OF GOVERNMENT PUBLICATIONS.

The under-mentioned Firms have been appointed sole Agents for the sale of Government Publications, including Parliamentary Reports and Papers, Acts of Parliament, Record Office Publications, &c., &c. (with the under-mentioned exceptions), and all such works can be purchased from them either directly or through retail booksellers, who, as well as the accredited Agents of Free Public Libraries, are entitled to a discount of 25 per cent. from the published prices :—

IN ENGLAND :—WYMAN AND SONS, LTD., Fetter Lane, E.C.

IN SCOTLAND :—OLIVER AND BOYD, Tweeddale Court, Edinburgh.

IN IRELAND :—E. PONSONBY, LTD., 116, Grafton Street, Dublin.

Hydrographical Works of the Admiralty are sold by Mr. J. D. POTTER, 145, Minories, E.C.

Patent Office Publications are sold at the Patent Office. (Classified Abridgments of Patent Specifications are sold also by Wyman and Sons, Ltd.)

The Publications of the Ordnance Survey and of the Geological Survey can be purchased from Agents in most of the chief towns in the United Kingdom, through any Bookseller, or from the Director General of the Ordnance Survey, Southampton, or, in the case of Ireland, from the Superintendent, Ordnance Survey, Dublin. In addition, Small Scale Maps are, as a rule, procurable at Railway Bookstalls in England and Wales.

The Journal of the Board of Agriculture is published monthly by the Board, at 4, Whitehall Place, S.W. Prior to April, 1907, it was published by Messrs. Laughton and Co., Ltd., 3, Wellington Street, Strand, W.C. Price 4d.

The following is a list of some of the more important Parliamentary and Official Publications recently issued :—

Statutes—

Public General Acts, 1910. In separate chapters, at varying prices.

Local and Personal Acts, 1910. 3d. per 4 pp.

Public General, Session 1909. With Index, Tables, &c. Cloth. 3s.

Second Revised Edition. 1235–1900. Vols I. to XX. 7s. 6d. each.

Statutes in Force. *Chronological Table and Index of*. 25th Edition. To the end of the

Session 9 Edward VII. (1909). 2 vols. 10s. 6d.

Acts of the Parliaments of Scotland, 1424–1707. *Revised edition*. 10s.

Statutory Rules and Orders other than those of a Local, Personal, or Temporary Character.

Issued in 1890 to 1909. 10s. each.

Statutory Rules and Orders revised, in force on Dec. 31, 1903. Vols. I. to XIII. 10s. each.

Statutory Rules and Orders in force on 31st December, 1909. Index to. (*In the press.*) 10s.

PARLIAMENTARY DEBATES. House of Lords and House of Commons; each daily part 3d.; also issued in bound volumes with Index.

VOTES AND PROCEEDINGS OF THE HOUSE OF COMMONS. Sess. 1910. Subscription Price 30s.

MINUTES OF PROCEEDINGS OF THE HOUSE OF LORDS. Sess. 1910. Subscription Price 30s.

HISTORICAL MANUSCRIPTS. Reports of the Royal Commissioners. In course of issue.

[Cd. 4499, 4945.] POOR LAWS AND RELIEF OF DISTRESS. Royal Commission. Majority and Minority Reports, with Index. 6s.

Do. Octavo edition, in 3 vols., without Index :—

Vol. I. Parts I. to VI. of the Majority Report, 1s. 6d.; Vol. II. Part VII. to the end of the Majority Report, 9d.; Vol. III. Minority Report, 1s. 9d.

[Cd. 4630.] Do. Report on Ireland. 9d.

[Cd. 4922.] Do. Report on Scotland. 2s. 8d.

[Cd. 4671.] PUBLIC HEALTH AND SOCIAL CONDITIONS. Statistical Memoranda. 5s.

[Cd. 5094.] STATISTICAL ABSTRACT OF THE BRITISH EMPIRE. 1894–1908. 1s. 3d.

[Cd. 4805.] Do. do. UNITED KINGDOM. 1894–1908. 1s. 8d.

[Cd. 4984.] Do. do. COLONIES. 1894–1908. 2s.

[Cd. 4837.] Do. do. BRITISH INDIA. 1898–1899 to 1907–1908. 1s. 3d.

[Cd. 5053.] Do. do. FOREIGN COUNTRIES. 1897–1907–8. 1s. 7d.

[Cd. 5159.] TRADE OF THE UNITED KINGDOM, 1909. Vol. I. 5s. 2d.

[Cd. 5165, 5166.] UNIVERSITY EDUCATION IN LONDON. Royal Commission. First Report, with Evidence, &c. 2s. 3½d.

[Cd. 5175, 5176.] PETROLEUM SPIRIT COMMITTEE. First Report, with Evidence, &c. 2s.

[Cd. 5180.] SMALL HOLDINGS. Report of Proceedings, &c. 1909. 10½d.

[Cd. 5201, 5203.] BANKRUPTCY LAW OF SCOTLAND. Report of Committee, with Evidence, &c. 1s. 8½d.

[Cd. 5219, 5278.] LEAD, &c., IN POTTERIES. Report of Committee on the Danger arising from Dust; with Appendices. 3s. 2d.

[Cd. 5229, 5230.] EMPLOYMENT OF CHILDREN ACT, 1903. Report of Committee, with Evidence, &c., into the working of. 4s. 8½d.

[Cd. 5247, 5248.] RAILWAYS. IRELAND. Royal Commission. Final Report, Evidence, &c.

[Cd. 5257, 5258.] SCOTTISH UNIVERSITIES COMMITTEE. Report, Evidence, &c. 1s. 1½d.

[Cd. 5263.] INFANT AND CHILD MORTALITY. Report. 1s. 3d.

[Cd. 5268.] AGRICULTURAL STATISTICS, 1909. Prices and Supplies of Corn, &c. 9d.

[Cd. 4804.] RAILWAY RETURNS, 1908. Capital, Traffic, &c. 1s. 3d.

[Cd. 4874.] COLONIAL IMPORT DUTIES. 1909. 2s. 9d.

[Cd. 5127.] NEW FRENCH TARIFF, as amended by law. Translation of. 11½d.

[Cd. 5160.] IMPORTS AND EXPORTS AT PRICES OF 1900. Tables, 1900–1909, with Memorandum. 2½d.

DUBLIN CASTLE,
25th August, 1910.

SIR,

I have to acknowledge the receipt of your letter of the 19th instant, No. 17138/10, forwarding for submission to His Excellency the Lord Lieutenant, a proof of the Report on the Trade in Imports and Exports at Irish Ports during the year ended 31st December, 1909.

I am,

Sir,

Your obedient Servant,

J. B. DOUGHERTY.

The Secretary,

Department of Agriculture.

REPORT ON THE TRADE
IN
IMPORTS AND EXPORTS AT IRISH PORTS
DURING THE YEAR 1909.

TO THE SECRETARY OF THE DEPARTMENT OF AGRICULTURE AND
TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the Sixth Report on Irish Imports and Exports dealing with the year ended 31st December, 1909.

As has been explained in previous issues these Reports have been subject to serious difficulties in collection and classification of information, but steady progress has been made both in bringing nearer to date the issue of the Reports and in improving the contents of the returns.

The first Report dealing with the year ended 31st December, 1904, was issued in November, 1906; the second Report in August, 1907; the third in June, 1908; the fourth in January, 1909; and the fifth in September, 1909.

A considerable advance has also been made since the issue of the first Report in the completeness of the returns, and owing to the general co-operation received from the Irish harbour boards and shipping companies engaged in Irish trade the present tables now represent close on 100 per cent. of the gross quantities of Irish imports and exports. But while the gross quantities of the trade are thus known the description of goods in regard to many consignments is still general and inadequate. Accordingly it should be clearly understood that these returns furnish a record of the import and export trade of the country which is only approximate, and claims to be neither complete as regards quantities nor exact as regards values.

In view of the importance of this consideration I desire to submit again a statement as to the present sources of information and the limitations which affect the reliability of these statistical returns.

From 1825, when the system of separate Customs was abolished, no record has been kept until recent years as to the trade between Great Britain and Ireland. Occasional returns were forthcoming regarding the quantities of particular articles imported or exported, but such information was slight and affords small clue to the changes which have taken place during the past 85 years. Since 1878 records exist with regard to the numbers of live stock exported from and imported into Ireland, but this is almost the only part of the cross-Channel trade of which a systematic account has been kept. In the case of foreign trade, the principal articles of the direct trade between Irish ports and the Colonies and foreign countries have been published

for many years by the Board of Customs in their Annual Statement of the Trade and Navigation of the United Kingdom. But the extent of this direct Irish foreign trade is very small, and amounts to less than 15 per cent. of the total external trade of Ireland with Great Britain and other countries.

On undertaking the work of compiling a comprehensive statement of Irish imports and exports, the Department, having no statutory authority to require returns of imports and exports, found that the only materials of information available as to the external trade of Ireland were those contained in the "manifests"—shipping documents in which are entered the items of cargo and their weight. Arrangements were accordingly made with the several port and harbour authorities, and in other cases directly with the shipping companies, to secure records, based on these manifests, as to cargoes landed or shipped at Irish ports, excluding such cargoes as are simply carried from one Irish port to another. But, as was pointed out in the first Report, the ship's manifest is itself in three respects a very imperfect source of information—first, as regards the description and classification of goods; second, in respect of their net weight or measure, and third, as to the money value of the goods. First, the description of certain classes of goods, especially manufactured articles, is general and indefinite. Thus, type-writers, sewing machines, bicycles, and gas engines are in many cases entered in the manifests as "machinery." Similarly, goods widely varying in character and value are returned under the general heading of "haberdashery." This defect, which makes accurate returns for such classes of articles impossible, is due to the fact that the description of goods entered in the manifest is made with a view to the rate-book, in which a system of general classification is necessary, whereas in a statement of imports and exports accurate particulars are of the greatest importance. Many inquiries have been made, both from the port authorities and amongst shippers, regarding the contents of these general consignments, and, where possible, the general totals have been distributed amongst their particular classes. But such distribution has to be done sparingly and is unsatisfactory. Second, while the manifest generally furnishes a statement as to the weight of goods, the weights are in most cases gross, and, consequently, in estimating values, allowance has to be made for tare and packing. This is not an easy matter, especially in respect of the imports of manufactured goods. Also, as was pointed out in the first Report, there is a serious lack of uniformity in measures and descriptions, sometimes local, which are in use in particular trades. Third, the manifests contain no statement of the value of the goods, and the shipping companies and harbour authorities are unable to state the value. As, however, it is of great importance that not only the quantity but also the money value of the several imports and exports should be stated, an official estimate of values has to be made. In forming such estimates careful inquiries have been carried on from year to year among importers and exporters as to the character and

value of the goods entered under the different headings, while the values of goods shown by the Board of Customs in their Annual Statement of Trade, and the current prices, as reported on authoritative market lists during the year, have also been consulted. But no matter what care is taken in making such supplementary inquiries, the work of valuation remains one of very considerable difficulty, and the absence of declared values is a serious defect in such returns. For, even though declarations of value may not in all cases be relied upon, in most cases such values are given truly, while by means of a proper system of scrutiny errors and wrong declarations can be to a large extent checked. Declared values, where properly supervised, are better than the best system of official values.

In view, therefore, of these defects in the original documents of information, it cannot be too plainly stated that as furnishing an index of the external trade of Ireland the present system is inadequate, and that if more complete and accurate returns are to be obtained it is necessary to establish a system which will ensure that (1) the description, (2) the weight or measure, and (3) the value of goods whether imported into or exported from Ireland shall be clearly declared at the port of entry or shipment.

While, however, the present returns are thus limited as regards completeness and accuracy, much information, sufficiently approximate to be of great practical value, has been obtained. First, the present series of returns furnishes a far more complete record than has been hitherto available as regards the total quantity and value of goods entering or leaving Irish ports, and has shown that the external trade of Ireland is much greater in extent and more representative in character than was hitherto believed. Second, in the case of agricultural produce, raw materials, and many of the more simple articles of manufacture, a fairly reliable approximation to the actual quantity and value imported and exported can now be made. Third, even with regard to the percentage of trade (approximately 25 per cent. of the total trade), in which the returns describe inadequately the classes of goods, and as to which the estimated values are liable to serious error, careful inquiries have been made, in which many exporters and importers have most generously facilitated the work of the Department, so as to reduce the possibilities of error and to ascertain as closely as possible the average value of these imports and exports. Fourth, it should be added that the returns have brought home the practical importance to Irish trade and industry of a system which will secure regular and reliable information with regard to the imports and exports of the country.

In the tables and figures herewith submitted, as explained in previous issues in this series of Reports, Irish imports and exports mean all goods imported or exported by Ireland, whether from or to Great Britain, the Colonies, or foreign countries—the terms including not only the Colonial and foreign, but also the Cross-Channel trade between Great Britain and Ireland. The

import and export trade is thus the sum of three things: (1) the direct trade between Ireland and all other countries outside of Great Britain; (2) the indirect trade of Ireland with these same countries *via* Great Britain; and (3) the local trade between Ireland and Great Britain.

As a result of inquiries which have been carried on each year since the figures for 1904 were published, a more accurate estimate can now be made regarding the values of certain classes of produce imported and exported during these years. In all such cases the figures have been revised. Where also information has been obtained as to imports and exports, regarding which no record was available when the previous Reports were published, an estimated allowance has been added for such trade. The figures have in this way been kept as strictly comparable as possible.

The total import and export trade at Irish ports in 1909 is estimated at £125,675,847 as compared with £117,017,768 in 1908, an increase of £8,658,079. The imports amounted to a total of £63,947,155 and the exports to a total of £61,728,692. The increase in the estimated value of the trade in 1909 as compared with 1908 has taken place both in imports and exports, the increase in imports amounting to £4,940,278 and in exports to £3,717,801. The following statement shows the total estimated values of imports and exports in the six years 1904-1909 during which a record of Irish external trade has been kept:—

	Imports.	Exports.	Total.
	£	£	£
1904 . . .	54,209,477	50,244,958	104,454,435
1905 . . .	55,759,452	51,972,708	107,732,160
1906 . . .	57,441,152	56,616,749	114,057,901
1907 . . .	61,579,426	59,815,188	121,394,614
1908 . . .	59,006,877	58,010,891	117,017,768
1909 . . .	63,947,155	61,728,692	125,675,847
1909 over 1904 .	9,737,678	11,483,734	21,221,412
„ „ 1905 .	8,187,703	9,755,984	17,943,687
„ „ 1906 .	6,506,003	5,111,943	11,617,946
„ „ 1907 .	2,367,729	1,913,504	4,281,233
„ „ 1908 .	4,940,278	3,717,801	8,658,079

From these figures it will be seen that the trade of 1909 while showing a very marked improvement on 1908—which was generally an unfavourable year in the annals of trade—also exceeds the records of any of the preceding years. In considering, however, the increases and decreases in trade during the years 1904-1909 it should be noted that the rise and fall in the total value of imports and exports is to some extent due to the rise and fall in the price of commodities. In the last six years there have

been considerable changes in the prices of the chief articles which make up the import and export trade of Ireland. Prices rose during 1905, 1906 and 1907. On the other hand, in 1908, prices in most commodities were lower than in 1907 though still remaining on the average slightly higher than in 1905 and 1906 and considerably above 1904. In 1909 prices again showed an advance. Thus, if identical prices were assumed for 1908 and 1909 the increase in the value of imports would amount to £2,656,579 instead of £4,940,278, and similarly in the case of exports the increase would amount to £1,067,115 instead of £3,717,801. But figures which are based on current prices, and thus allow for the change in value as well as in volume, remain the best index of the commercial importance of Irish trade.

It will also be remembered that the figures in the tables of imports and exports include not only articles imported for home consumption but also consignments which have been returned or re-exported without going through any process of manufacture, as with the present restricted means of information it is not possible to distinguish imports or exports from what are strictly speaking returned exports or returned imports. But, as has been pointed out in previous reports, this trade is a small proportion of the total Irish trade. In the case of certain articles such as tea, coffee, sago, it is evident that the quantities exported represent re-exports, which it may be assumed have undergone no change, and are either being returned or in certain cases re-distributed. In respect of other articles, however, such as leather, apparel, machinery, etc., it is a matter of considerable difficulty to ascertain, even approximately, the proportion of (a) goods which are re-exports or returned goods, (b) goods which having been exported and having undergone some process of manufacture are then exported, and (c) goods which are largely or wholly the product of Irish industry. Making as careful an estimate as existing information permits it would appear that in 1909 goods to the value of approximately £2,700,000* may be taken to have been returned or re-exported without undergoing any process of manufacture. Deducting this sum from the totals of imports and exports respectively it leaves in 1909 for the purposes of Irish consumption and manufacture a net total import of approximately £61,247,155 and a net Irish export of approximately, £59,028,692, the total Irish trade, excluding re-exports, amounting in 1909 to £120,275,847. The corresponding figure for 1908 was £111,217,768. The re-imports are small.

* The main articles contributing to this total figure are:—Wines, foreign and colonial spirits, guns and rifles, butter, chemicals, dyes and tanning substances, glass and glassware, maize, hops, Indian meal, rice, sago, etc.; boots and shoes, indiarubber goods, musical instruments, machinery and hardware, oils, paints, sponges, sugar, tea, raw cotton, piece goods, haberdashery, unmanufactured tobacco. The largest re-export is raw cotton, almost all of which was shipped from Belfast, the value re-exported in 1905 being £1,029,585, in 1906 £704,320, in 1907 £1,253,894, in 1908 £1,473,771, and in 1909 £1,243,495.

IMPORTS.

In order to indicate briefly the main divisions of the trade the preceding summary has been adopted, showing respectively the various classes of (1) farm produce, food and drink stuffs, (2) raw materials, and (3) manufactured goods. Any such classification has drawbacks. There are certain goods which might be placed in one class or another. Thus hides and skins, wool, flax, etc., which are farm produce, are classed under raw materials. Thus also a number of articles in the first group, *e.g.*, butter, bacon, wines, ales, spirits, tobacco, etc., have undergone varying degrees of manufacture and might be classed as manufactured imports and exports. But the present division is simple, well known, and of practical interest, and with the particulars set forth in the accompanying tables it is easy to re-arrange the groups for other purposes of comparison as may be required.

It will be seen from the above tables that in the case of imports the increase in 1909 has taken place in all three classes, but chiefly in farm produce and in manufactured goods. The increase in farm produce has taken place largely in respect of wheat and maize, the imports of wheat alone exceeding in value those of 1908 by over one million sterling. In manufactured goods the increase has taken place almost entirely in respect of the goods classified as piece goods, apparel, drapery, etc., the imports of which exceed those of 1908 by an estimated value of close on two millions sterling.

In the case of exports the value of farm produce slightly exceeds either of the preceding years, 1907 and 1908, and is considerably over the exports of earlier years. In raw materials there is a marked increase in the value of hides and skins and wool exported. It is, however, in the group of manufactured goods that the increase in exports is mainly seen. Owing to high values and large shipments the exports of piece goods exceed by $3\frac{3}{4}$ millions sterling those of 1908, and by over 2 millions sterling those of 1907. On the other hand the value of the exports of ships, machinery, and implements is below that of any year since 1904.

Following the classification in the above summary attention is directed to the main groups and the articles of chief importance in them.

I.—FARM PRODUCE, FOOD AND DRINK STUFFS.

The group of farm produce, food and drink stuffs represents an import and export amounting in 1909 to £59,608,786 out of a total of all imports and exports estimated at £125,675,847. It is important to note that a very large proportion of even the imports into Ireland consist of agricultural produce, bacon, butter,

eggs, poultry, grain, flour, food stuffs, fruit, and vegetables. And if to these articles are added flax, hides, wool, skins, etc., which are included under raw materials, the total import of farm produce alone exceeds 22 millions an increase of over $2\frac{1}{2}$ millions sterling on the preceding year in these commodities. This feature of Ireland's trade deserves close attention, as it is significant that this country with its agricultural capacity and potentiality should be annually importing so great a quantity of farm produce, much of which it is admirably suited to raise at home.

In the case of exports from Ireland, live stock, bacon and hams, butter, poultry, eggs, oats, potatoes, vegetables, and flax, etc., together with the products of the live stock industries, such as hides, skins, wool, feathers, etc., amount to a value altogether exceeding $31\frac{1}{2}$ millions sterling or half the total exports of Ireland. Large as this export is, the fact is seldom realised that Ireland, while exporting annually 30 millions of farm produce and food stuffs is importing other food stuffs and farm commodities of a value of over 20 millions.

The several articles belonging to the large group of farm produce, food and drink stuffs are mostly simple in character, and for this reason the quantities and values in this division as also in that of raw materials represent in all probability the actual extent and value of the trade much more closely than is the case with manufactured articles.

The first and still the chief agricultural export of Ireland is that of live stock amounting
Live Stock. in 1909 to a total estimated value of £14,873,426, an increase over the exports of each of the preceding years, excepting 1908, when the total value was estimated at £14,937,605. With regard to the main items in this class in 1909 the export of horses showed an increase as compared with 1908, though still below the export of 1905, 1906 and 1907. In cattle there was an increase in the export of fat stock and a decrease as compared with 1908 in stores, though the latter number was considerably above the average of recent years. The total number of cattle shipped in 1909, amounting to 838,583, while lower than in 1907 or 1908, was above the export of any previous years excepting 1902 and 1903. There was a heavy export of sheep and lambs in 1909, the shipments considerably exceeding those of recent years and being the highest returned since 1902. On the other hand, in the case of swine the decrease in exports continues, the number exported in 1909 falling to 327,129, the lowest figure on record since 1878, when the published returns of the exports of animals from Ireland were first issued.

The following statement gives the numbers and estimated values of live stock exported in the years 1906, 1907, 1908, and 1909:—

	Number.				Value.			
	1906.	1907.	1908.	1909.	1906.	1907.	1908.	1909.
Horses, . . .	33,896	33,356	28,804	29,365	£1,578,005	£1,541,815	£1,347,225	£1,369,395
Cattle—Fat, . .	240,617	292,337	258,372	266,269	3,749,615	4,622,579	4,264,406	4,351,279

Total Cattle, . .	776,281	843,010	862,634	838,583	9,146,915	10,372,804	10,935,197	10,689,356
Sheep, . . .	293,626	317,167	367,224	431,241	681,457	730,806	826,477	830,885
Lambs, . . .	365,796	346,196	358,333	442,060	562,411	536,604	489,722	526,134
Total Sheep & Lambs	659,422	663,363	725,557	874,301	1,243,868	1,267,410	1,316,199	1,357,019
Swine, Fat, . .	409,510	448,578	371,537	316,891	1,433,285	1,570,023	1,300,380	1,426,010
„ Stores, . .	19,920	33,329	15,939	10,238	44,820	66,658	31,878	25,595
Total Swine, . .	429,430	481,907	387,476	327,129	1,478,105	1,636,681	1,332,258	1,451,605

Live stock imports into Ireland are very small, the total estimated value of the same in 1909 amounting to £278,809 as compared with £302,680 in 1908. This figure, it should be remembered, includes a considerable number of horses which are temporarily imported chiefly for sporting purposes and which also swell the export returns. The largest farm stock import is of sheep and lambs, of which 30,053 were imported in 1909 as compared with 34,270 in 1908. A few breeding cattle are also imported.

XV.

The exports and imports of dead meat, bacon and hams, game, etc., form also a very important and interesting class. In 1909 the total value of these exports from Ireland was estimated at £3,795,643 while the corresponding imports amounted to £2,653,323. During recent years there has been a steady rise in the value of these exports, while the corresponding imports show a tendency to fall, a tendency which has been more marked in 1909 than in any preceding year. The following table shows for the years 1906-1909 the estimated total value of each main class imported and exported:—

IMPORTS.

	Quantities.				Values.

(a) Poultry is not included here.

(b) It is found that under this heading considerable quantities of bacon and hams are exported. Owing to improved returns, many of these quantities formerly returned under this heading are now definitely specified as bacon or hams.

There are many interesting points to note in this table. As regards imports it will be seen, first, that in 1909 the total of foreign and colonial beef and mutton imported into Ireland showed an increase over 1907 and 1908 but was still below that of 1906; second, that there was a marked falling off in the import of foreign and colonial bacon and hams into Ireland in the past year.

With regard to the exports from Ireland there was a decrease in the quantity of bacon and hams as compared with the very high figures of 1908, but in consequence of the rise in prices the total estimated value showed an increase on even the preceding year, the estimated value of these exports in 1909 amounting to £3,466,707. This total exceeded by £1,332,301 the estimated value of the total imports of bacon and hams in 1909. In this connection also it should be remembered that the total export of Irish bacon and hams is even greater than appears from these returns. For, as was pointed out in previous Reports, it is known that part of the exports returned as "Provisions and Groceries" consists of bacon and hams. And if to this export is added the export of pork and coarse pig meat, the value of the products of the pig exported will amount to over £3,500,000 sterling. It is interesting thus to note that, including the export of live pigs, the total export value of pigs and pig produce in 1909 amounted to a sum of over £5,000,000 sterling.

The import of preserved and tinned meat increased in 1909 to £110,299 as compared with £92,884 in 1908, and the export of preserved and tinned meat fell from an estimated value of £19,543 in 1908 to £18,930 in 1909, which is, however, greater than the value exported in 1907. Additional quantities of tinned meat are probably shipped under the name of "Provisions and Groceries."

The returns indicate an increase in the export of poultry as compared with 1908. The estimated value
Poultry. exported in 1909 amounted to £857,276 as compared with £797,376 in 1908, £847,247 in 1907, £855,176 in 1906, and £826,658 in 1905. It is estimated that one-third of these values consisted of live poultry.

There was a decrease in the quantity of eggs exported in 1909 as compared with 1908, the total quantity exported
Eggs. being less than in any of the three preceding years, though the figures for 1908 are above those of the years 1904 and 1905. Owing, however, to improved prices the total value exported in 1909 is the highest total value of eggs as yet recorded.

The following statement shows the quantities and estimated values of imports and exports of eggs during the years 1904-1909:—

Year.	Imports.		Exports.	
	Gt. Hds.	Value. £	Gt. Hds.	Value. £
1904 . . .	114,192	37,112	5,738,129	2,044,208
1905 . . .	116,380	41,218	6,194,132	2,387,322
1906 . . .	99,755	37,408	6,494,532	2,604,578
1907 . . .	103,107	41,036	6,675,599	2,781,500
1908 . . .	101,999	41,487	6,501,195	2,729,147
1909 . . .	81,891	34,805	6,362,714	2,863,221

The exports of eggs and poultry together in 1909 amounted to £3,720,497, and if to this is added the export of feathers, amounting in 1909 to £32,968, a total export of £3,753,465 is recorded. These figures do not include the value of the quantity sent by parcel post.*

The imports of poultry and eggs into Ireland are small, amounting in 1909 to £49,208 as compared with £76,756 in 1908. Thus, in estimating the value of the poultry and egg industry to the country, it should be borne in mind that practically the entire home demand is supplied by the home article, and that the export represents the surplus production of poultry and eggs. These facts bring home the great importance and value of the poultry and egg industries to Ireland. Attention is specially directed to diagram III. (see page xxxiv) which shows (1) the total monthly import of eggs into the United Kingdom from foreign and colonial countries; (2) the quantity of eggs exported from Ireland each month in 1909; and (3) the monthly average export price of Irish eggs.

There was again a considerable fall in the quantity of butter exported, supplies being seriously affected, especially in the southern counties, by the dry season.

Butter.

At the same time it should be borne in mind that the number of milch cows in Ireland in June, 1909, was returned as 1,460,107 as compared with 1,586,425 in 1908, a considerable decrease which would make itself felt in the output and export of Irish butter. The monthly export was less for each month of 1909, as compared with 1908, excepting the two months of August and October when there was a slight increase.

* So far as agricultural produce is concerned the parcel post trade is mainly confined to the carriage of butter, eggs, and poultry. Through the courtesy of the Postmaster-General, the Department have been informed that approximately 3,360,000 parcels are posted annually from Ireland to Great Britain, that it is estimated that about 1,120,000 parcels are of butter, eggs, and poultry, and that the average weight of all inland parcels is 2 lb. 10 ozs. Assuming the export of butter, eggs, and poultry by parcel post to have an average weight per parcel of 3 lbs., the export by parcel post of butter, eggs, and poultry would amount to 30,000 cwts.

The changes in the quantities and values of butter imported into and exported from Ireland during the period 1904-1909 may be seen from the following table:—

Year.	Imports.		Exports.	
	Cwts.	Value.	Cwts.	Value.
		£		£
1904 . . .	59,053	300,924	818,252	3,666,792
1905 . . .	57,438	314,234	813,921	4,048,409
1906 . . .	60,194	350,128	844,027	4,283,437
1907 . . .	63,258	360,571	818,004	4,009,072
1908 . . .	62,918	384,287	751,942	4,026,023
1909 . . .	68,347	394,867	719,625	3,625,111

As in the case of eggs, these figures do not include quantities sent by parcel post. There is also difficulty in obtaining a record of small consignments of butter under 28 lbs. as these are frequently entered in the returns as “ parcels ” or “ sundries.” And as there is reason to believe that this class of trade is on the increase the fact may to some extent account for the apparent shrinkage in exports. Attention is directed to the diagram (see page xxxiv) which shows (1) the imports into the United Kingdom from the Colonies and foreign countries; (2) the quantity of butter exported each month from Ireland; and (3) the average monthly export price of Irish creamery butter.

The quantity of margarine imported in 1909 amounted to 45,680 cwts., valued at £117,626, as compared with 46,243 cwts., valued at £118,498 in 1908.

Margarine. The exports of margarine amounted to an estimated value of £169,394 in 1909 as compared with £136,007 in 1908.

The returns showed an increase in the imports of cheese. The quantity imported in 1909 amounting to 42,611 cwts., valued at £121,441 as compared with 36,159 cwts. valued at £103,053 in 1908; 44,445 cwts. valued at £128,890 in 1907; and 40,906 cwts. valued at £117,605 in 1906. There was again an increase in the small export of cheese, the quantity exported in 1909 amounting to 4,015 cwts. valued at £11,443, as compared with 3,231 cwts. valued at £9,208 in 1908; 2,460 cwts. in 1907 valued at £7,134; and 1,222 cwts. in 1906, valued at £3,513.

There was a great increase in the export of fish from Ireland in 1909, the total value of fish, including shell-fish, exported being estimated at £724,476 as compared with £440,461 in 1908, £402,746 in 1907, £459,215 in 1906, and £403,425 in 1905. The increase was very marked in the export of cured herrings, shipped mainly

Fish.

from Londonderry and Downings; the quantity of cured mackerel also showing an increase. There was too a considerable increase in the exports of salmon and trout owing to larger shipments via Dublin. On the other hand the value of fish, including shell-fish, imported in 1909 was estimated at £323,656 as compared with £277,431 in 1908, £272,849 in 1907, £258,799 in 1906, and £277,521 in 1905.

In the summary tables on pp. x. and xi., grain and other foods intended for human consumption have, as far as possible, been distinguished from the feeding-stuffs for animals, as it is important to see the respective amounts of these two kinds of imports. In several cases, however, the imports may be, as in the case of oats or of Indian meal, partly for food-stuffs and partly for cattle feeding, and therefore this division can only indicate broadly the extent of the two classes of imports.

Much the largest import among the grain goods is wheat and wheat flour. The quantities and estimated values imported into Ireland respectively in the years 1904, 1905, 1906, 1907, 1908, and 1909 were as follows:—

	Wheat Imports.		Wheat Flour Imports.	
	Cwts.	Value.	Cwts.	Value.
		£		£
1904 . . .	6,932,956	2,599,857	5,529,278	2,764,639
1905 . . .	7,502,728	2,907,307	5,596,214	2,798,107
1906 . . .	6,927,827	2,439,172	5,399,355	2,521,187
1907 . . .	7,147,511	2,829,223	5,261,607	2,652,726
1908 . . .	6,764,866	2,931,442	4,697,156	2,563,865
1909 . . .	8,233,011	3,979,289	4,513,657	2,595,353

From these figures it appears that the quantity of wheat imported in 1909 was much greater than in any of the five previous years, while the total value of the imports was estimated to be £1,047,847 higher than in 1908. The imports of wheat flour, on the other hand, showed a decrease in quantity in 1909, the total amount imported being less than in any of the five previous years, though the total value was higher than in 1908. In the agricultural statistics of Ireland the amount of Irish-grown wheat in 1909 was estimated at 939,815 cwts., and if it is assumed that one and a-half tons of wheat produce one ton of flour, the total quantity of flour represented by imports of wheat and flour and by home-grown wheat amounted to 10,628,874 cwts. From this quantity has to be deducted an export of flour, or its equivalent in wheat, amounting to 294,254 cwts., leaving thus a residue of 10,334,620 cwts. for consumption in Ireland.

In the case of oats the imports amounted to 583,372 cwts. in 1909 as compared with 401,095 cwts. in 1908, 190,049 cwts. in 1907, and 321,207 cwts. in 1906, while the exports amounted to 1,249,172 cwts. in 1909 as compared with 1,449,111 cwts. in 1908, 1,505,275 cwts. in 1907, and 1,297,925 cwts. in 1906. The imports of oatmeal fell in 1909 to 134,748 cwts. as compared with 194,798 cwts. in 1908, 174,185 cwts. in 1907, and 170,984 cwts. in 1906; the exports amounted to 164,998 cwts. in 1909 as compared with 150,044 cwts. in 1908, 181,228 cwts. in 1907, and 188,949 cwts. in 1906. But, as was pointed out in previous Reports, in considering the imports of oatmeal, allowance must be made for a quantity of what is returned as "meal," estimated roughly at one-third, being oatmeal or similar meals for human consumption, the remaining two-thirds of these unclassified meals being cattle meals. The quantities of "unclassified" meals in the imports diminished from 278,873 cwts. in 1906 to 219,645 cwts. in 1907, and to 130,753 cwts. in 1908, but rose again to 193,590 cwts. in 1909.

The quantity of barley imported in 1909 amounted to 1,216,627 cwts. as compared with 1,181,987 cwts. in 1908, 1,060,549 cwts. in 1907, and 1,043,908 cwts. in 1906. The exports of barley showed a remarkable increase, the shipments amounting to 211,891 cwts. in 1909 as compared with 36,778 cwts. in 1908, 29,185 cwts. in 1907, and 42,510 cwts. in 1906. The exports of malt also showed a striking increase, amounting to 161,045 cwts. in 1909 as compared with 79,379 cwts. in 1908 and 85,132 cwts. in 1907. The imports of malt amounted to 652,872 cwts. in 1909 as compared with 808,817 cwts. in 1908, and 566,189 cwts. in 1907.

Among feeding stuffs the chief import is maize, a very great quantity of which is annually imported into Ireland. The amount imported in 1909, while much greater than that in 1908, was less than in several preceding years, but owing to the high price of maize the total cost of the import was greater than in any year except 1907. A considerable quantity, however, is each year re-exported—in 1909 to the value of £248,660. The following are total quantities and values of maize imported in the years 1904-1909:—

	Cwts.	Value.
		£
1904	13,251,493	3,147,229
1905	11,268,018	2,957,854
1906	13,404,190	3,295,197
1907	15,147,026	4,133,876
1908	10,924,929	3,368,520
1909	12,527,450	3,862,630

Together with the above import of maize, the imports of bran, pollard, and the various classes of cattle meals, brought the total value of feeding stuffs imported in 1909 to a sum estimated at £5,007,091 as compared with £4,417,586 in 1908, £5,164,899 in 1907, £4,163,148 in 1906, and £3,752,944 in 1905.

The imports of fruit into Ireland are considerable and increasing, being estimated at £778,948 in 1909 as compared with £699,625 in 1908, £687,026 in 1907, £609,523 in 1906 and £587,639 in 1905.

Fruit and Preserves. The exports of fruit are comparatively small, although the returns do not adequately represent the extent of the trade.

In the case of jams and preserves the imports amounted to £172,339 in 1909, as compared with £147,963 in 1908, £140,823 in 1907, and £116,949 in 1906. The exports amounted to £61,879 in 1909 as compared with £56,324 in 1908, £56,481 in 1907, and £57,205 in 1906.

Among vegetables the largest import is that of onions, of which 219,706 cwts. were imported in 1909, as compared with 223,488 cwts. in 1908, 237,136 cwts. in 1907, and 231,492 cwts. in 1906. The chief export of vegetables is that of potatoes, of which 119,785 tons were exported in 1909, valued at £341,886, as compared with 109,681 tons in 1908, valued at £379,313; 100,309 tons in 1907, valued at £394,967, and 112,892 tons in 1906, valued at £321,742.

There was an increase in the quantity of tea and sugar imported in 1909. The quantity of tea imported was returned as 34,334,832 lbs. in 1909, as compared with 32,837,728 lbs. in 1908, 32,890,256 lbs. in 1907, and 33,186,030 lbs. in 1906; the quantity of coffee imported was returned at 1,274,784 lbs. in 1909, as compared with 1,293,152 lbs. in 1908; 1,311,148 lbs. in 1907, and 1,222,716 lbs. in 1906. The quantity of sugar imported was 2,857,832 cwts. in 1909, as compared with 2,697,955 cwts. in 1908, 2,819,987 cwts. in 1907, and 2,744,444 cwts. in 1906.

As regards tobacco, the import of manufactured tobacco amounted to 2,780,994 lbs. in 1909, as compared with 2,589,770 lbs. in 1908, 1,950,527 lbs. in 1907, and 2,406,026 lbs. in 1906, while the import of unmanufactured tobacco amounted to 12,977,483 lbs. in 1909 as compared with 11,374,445 lbs. in 1908, 10,622,771 lbs. in 1907, and 13,097,789 lbs. in 1906. The export of manufactured tobacco amounted to 6,863,897 lbs. in 1909 as compared with 6,072,365 lbs. in 1908, 5,791,005 lbs. in 1907, and 5,810,447 lbs. in 1906.

The total estimated value of wines, spirits, ales, etc., imported showed a continued fall from £1,385,798 in 1905, to £1,301,888 in 1906, to £1,191,754 in 1907, to £1,184,864 in 1908, and to £1,108,105 in 1909. The imports of British spirits fell from a value of £117,343 in 1908 to

£77,233 in 1909; foreign spirits from £119,827 in 1908 to £105,941 in 1909; ale and beer from £502,178 in 1908 to £464,921 in 1909. The total estimated value of spirits, stout, porter, etc., exported amounted to £3,658,908 in 1909 as compared with £4,176,833 in 1908, £4,289,593 in 1907, and £4,063,554 in 1906. The value of home-made spirits exported in 1909 was estimated at £1,642,660 as compared with £2,195,959 in 1908, £2,304,874 in 1907, and £2,139,587 in 1906. The value of stout and porter exported was estimated at £1,653,113 in 1909 as compared with £1,642,660 in 1908, £1,613,776 in 1907, and £1,509,567 in 1906. The export of aerated waters was estimated at £230,016 in 1909 as compared with £223,936 in 1908, £252,667 in 1907, £248,690 in 1906, and £214,402 in 1905.

Among sundry food stuffs, the chief items are biscuits and confectionery. The imports of biscuits in 1909 were estimated at £100,080 as compared with £84,741 in 1908, £86,038 in 1907, £76,233 in 1906, and £68,833 in 1905. The exports of biscuits are much larger than the imports, and have shown a steady increase from £306,739 in 1905 to £332,419 in 1906, £338,290 in 1907, £355,348 in 1908, and £388,724 in 1909. In the returns under the head of confectionery the imports are much greater than the exports, and increased from £269,381 in 1905 to £306,109 in 1906, £339,901 in 1907, £346,049 in 1908, and £392,582 in 1909. The export of confectionery in 1909 was estimated at £102,489 as compared with £96,364 in 1908, £96,760 in 1907, £102,434 in 1906, and £106,878 in 1905.

In order to furnish the means for comparing (1) the exports of **Imports of Agricultural Produce from Colonial and Foreign Countries.** agricultural produce from Ireland with (2) the imports of similar products from colonial and foreign countries into the United Kingdom, a table is presented as Appendix II. showing for the year 1909 the quantities and values of the chief articles of agricultural and horticultural produce imported into the United Kingdom* from British possessions and foreign countries and the corresponding quantities exported from Ireland to Great Britain.

* At present (excepting certain specified articles) the quantities and values of foreign and colonial goods imported are known for the United Kingdom only. Nothing beyond an estimate can be formed as to how far these goods are imports for consumption in Great Britain and how far for consumption in Ireland. For though the import of goods from Great Britain to Ireland is known, it cannot be said how far these goods are foreign or colonial and how far they are British produce. Thus in the case of butter, bacon, and eggs, it is known that the imports from Great Britain into Ireland are of foreign or colonial origin, and a close estimate could therefore be made of the net import of these commodities from colonial and foreign countries for consumption in Great Britain and in Ireland respectively. But in the case, for example, of flour much of the very large import from Great Britain into Ireland may be foreign, or it may be British milled flour made from foreign or from British wheat, and with most of the other articles the question is even more difficult. At present, therefore, it is not possible to show the foreign and colonial imports into Great Britain alone, or to furnish an exact comparison between the imports into Great Britain of Irish produce and colonial and foreign produce respectively.

This table will bring home to Irish producers and exporters the extent of the existing market in Great Britain, and the present strength in that market of the several competitors, while at the same time it shows the very important position which Ireland at present holds in the British market.

Thus in 1909 :—

(1) The value of the Irish export of all classes of live stock was twice as large as the value imported into the United Kingdom from all foreign and colonial countries. In this connection it is worthy of note that the export of horses from Ireland amounted to 29,365, and if from this figure is deducted even the total number of horses imported into Ireland, there remains a net export of 24,673 horses. The total number of horses imported into the United Kingdom from all foreign and colonial countries amounted in 1909 to 16,774, of which 9,031 came from Russia. Again, in the case of cattle, the number exported from Ireland to Great Britain was 838,583 in 1909, while the total import from foreign and colonial countries into the United Kingdom amounted to 320,330, of which number 205,449 came from the United States and 113,583 from Canada.

(2) The Irish export of butter, £3,625,111, to Great Britain was the second largest in quantity and value; the export from Denmark into the United Kingdom being first, £10,247,320, and that from Russia third, £3,001,764.

(3) The Irish export of eggs was second largest in total quantity and value, amounting to 6,362,714 gt. hdds., valued at £2,863,221, the imports into the United Kingdom from Russia being the largest, amounting to 8,154,635 gt. hdds., valued at £2,929,487.

(4) The export of poultry from Ireland was much greater than that from any other country into the United Kingdom, Ireland exporting to Great Britain poultry to the value of £857,276, while the highest imports from other countries to the United Kingdom were—from Russia, £351,918; France, £156,085; and United States, £149,552.

(5) As regards bacon and hams, the Irish export, £3,466,707, was third on the list, the largest supplies coming from the United States of America, £9,009,557, and from Denmark, £5,802,646. The imports from Canada fell from £3,353,416 in 1908 to £1,364,357 in 1909.

(6) The Irish export of potatoes was the largest quantity imported into Great Britain. The next largest quantities were imported from France and the Channel Island, but as their trade is chiefly in early potatoes, the value is much greater than that of the Irish export.

(7.) As regards oats, the export from Ireland was fifth, Russia, Argentina, Germany, and New Zealand, being the largest exporters to the United Kingdom.

The above cases are sufficient proof of the very strong position which Ireland holds in the markets of Great Britain, and as these are the great open markets of the world for agricultural produce, the figures bring out plainly the wide and representative character of Irish agricultural exports.* This consideration should, therefore, be kept in mind when comparisons are made between the export of particular commodities from Ireland and the corresponding export from any other country, such as the butter export of Denmark, and that of Ireland. Thus, in the case of Denmark, which is frequently compared with Ireland, the total exports of home produce and manufacture to all countries in 1909 amounted to £24,602,540† of which £23,068,804 consisted of agricultural produce. The chief articles of export were butter, £10,015,665, pig produce, £5,812,197; eggs, £1,450,966; horses and foals, £830,472; cattle, £1,500,961. Over three fourths of the Danish agricultural exports are sent to the United Kingdom.

These figures present interesting contrasts with the present Irish agricultural exports, and bring into relief the more highly diversified interests which Ireland has as a country of production and export. Apart from Denmark, it is noteworthy that the country which is and promises to be the most serious competitor with Ireland in the British market, as regards the important articles of butter, eggs, and poultry, is Russia, the export from that country in 1909 amounting to, in butter, 601,712 cwts., valued at £3,001,764; eggs, 8,154,635 gt. hdds., valued at £2,929,487; and poultry, valued at £351,918.

II. RAW MATERIALS.

For the purposes of the broad classification adopted in the summary tables, pp. x. and xi., raw materials include coal, coke, rough and sawn timber, boards and deals, stones, slates, sand, clay, metal ores and other mineral substances, hides, skins, horns and hoofs, wool, bristles, feathers, flax, raw cotton, hemp, jute, tow, waste, seeds, plants and bulbs, ice, &c. The total value of raw materials imported into Ireland in 1909 was estimated approximately at £9,420,724, as compared with £9,018,574 in 1908. The imports consist mainly of coal, wood, flax, and other raw materials of the textile industries. There is also a large import of raw cotton, which is re-exported to Northern Europe.

The exports in 1909 were estimated at a value of £4,586,650, as compared with £4,106,313 in 1908. Excluding the re-export of raw cotton, these consist mainly of animal produce, such as hides, skins, wool, fats, &c., and, to a lesser extent, of seeds, timber, and other vegetable produce.

* Irish export values are f.o.b., and thus do not include cost of transit from Irish Ports to British market centres; whereas foreign and Colonial imports are c.i.f., and thus include transit costs. This difference makes the total foreign values, *e.g.*, of eggs, butter, etc., appear somewhat higher relatively to the Irish than they actually are.

† This and the following figures in this paragraph are taken from the Danish Official Statistics, and are f.o.b. They are, therefore, more strictly comparable with the values of the Irish exports.

The estimated values of the chief imports of raw materials in 1905-1909 were as follows:—

IMPORTS.

—	1905.	1906.	1907.	1908.	1909.
	£	£	£	£	£
Coal, . . .	2,246,073	2,370,235	2,837,825	2,826,940	2,577,398
Slates, . . .	108,872	92,416	89,363	89,087	144,898
Timber, . . .	1,155,062	1,463,201	1,354,916	1,185,950	1,360,665
Flax, . . .	1,777,311	1,705,502	1,914,328	1,381,479	1,912,667
Hemp and Jute, Tow and Codilla, .	711,276	619,261	597,142	548,696	522,847
Lard, Tallow, &c., .	223,072	297,540	327,478	330,494	471,265

The values of the chief exports in the same years were:—

EXPORTS.

—	1905.	1906.	1907.	1908.	1909.
	£	£	£	£	£
Timber, . . .	250,104	314,107	278,716	237,173	245,022
Hides and Skins, .	516,718	582,492	524,649	486,754	614,106
Wool, . . .	552,124	610,144	611,813	407,024	747,320
Lard, Tallow, &c., .	404,727	430,134	479,672	494,695	625,978
Grass Seed, . . .	240,714	222,794	349,073	368,866	403,070

In connection with the above figures it should be stated that the imports of wood and timber, estimated in 1909 at a value of £1,360,665, consist mainly of sawn timber, boards and deals, whereas 90 per cent. of the exported timber is shipped out of the country in the round or rough state—an uneconomic condition of affairs. The large export, likewise, of hides and skins, amounting in 1909 to £614,106, should be compared with the imports of leather and leather goods, boots, shoes, saddlery, &c., which approximate a value of £2,400,000 of goods imported. Again, there is a very great export of wool, which rose in 1909 to the large quantity of 17,714,256 lbs., of an estimated value of £747,320. It is estimated that over three-fourths of the total wool clip in Ireland is exported, and, while the output of the woollen industries in Ireland is also rising, the imports of woollen goods remain largely in excess of exports, though there was an increase in the quantity and value of woollen goods exported in 1909. Thus it is not simply in one branch, but in several—in wood, hides and skins, wool, as well as in various minor exports, such as feathers, kelp, and most of all in her store cattle—that Ireland is exporting the raw materials of industry.

III. MANUFACTURED ARTICLES.

The third division of Irish imports and exports is that of manufactured goods. In 1909 these represented an import the total value of which is estimated at, approximately, £30,000,000, or 46 per cent. of the total value of imports. The export of manufactured goods was estimated, approximately, at £22,000,000, or nearly one-third of the value of the total export. But to a greater extent than in the case of the imports and exports of either agricultural produce or raw materials the figures indicating the value of manufactured articles must be taken as only approximate in character. For while the existing returns indicate the actual gross weight and quantity of manufactured articles imported and exported, there is great difficulty in determining what is the quality and value of these goods, especially in the case of the more highly differentiated articles. So far as is at present possible, the estimated values have been checked by means of wide and careful inquiries among importers and exporters, through whose courtesy in many cases exact data regarding the gross weight and value of representative consignments of goods have been obtained; but it cannot be too plainly said that until import and export returns are available, which specify the nature, weight, and value of goods, any figures put forward with regard to the import and export value of manufactured articles can only be regarded as approximate in character.

At the same time it should be clearly understood that the present returns are not arbitrary statements, that they are based on actual figures of weights of goods imported and exported, and on careful inquiries as to value, and that they furnish as close an estimate as is at present possible of the extent and character of this class of Irish trade.

• As there is a wide range of manufactured imports and exports, these have been divided, as in the previous Reports, into a number of main groups.

The first and largest group is that of the textiles. The combined imports and exports of manufactured textile goods amounted to a value estimated in 1909 at £32,239,308, as compared with £25,829,080 in 1908, £29,116,674 in 1907, £27,354,557 in 1906, and £24,441,015 in 1905, a sum exceeding one-half of the total value of manufactured imports and exports of Ireland, and which is one-fourth of the total estimated value of all goods imported and exported to or from Ireland in the year 1909. This fact alone indicates the great importance of the textile group of manufactured goods. The combined textile imports—yarns, piece goods, and made-up goods—amounted in 1909 to an estimated value of £14,793,765, as compared with £12,268,791 in 1908, £13,335,675 in 1907, £12,935,586 in 1906, and £12,138,017 in 1905, while the corresponding textile exports showed an estimated value of £17,445,543 in 1909, £13,560,289 in 1908, £15,780,999 in 1907, £14,418,971 in 1906, and £12,302,998 in 1905.

Distinguishing yarns, thread, rope, cordage, etc., from piece goods and made-up goods, the imports of the former **Yarns, Thread, Rope, etc.** were in 1909 estimated at £2,265,312 as compared with £1,737,381 in 1908, £1,720,178 in 1907, and £1,867,002 in 1906. In this amount the chief items were cotton yarn £880,606; linen yarn, £784,413; woollen yarn, £148,565; and yarn unclassified (which inquiry shows to contain a large amount of woollen yarn), £170,503. There was also an import of thread, estimated at £171,170. The corresponding exports of yarn, thread, rope, twine, cordage, etc., were estimated in 1909 at £2,160,556, as compared with £2,026,946 in 1908, £2,656,906 in 1907, and £2,280,155 in 1906. Of this amount the main items were—linen yarn, £1,233,466; thread, £397,731; rope, cordage, and twine, £401,724.

Much the largest part, however, both of textile imports and exports consists of piece goods, ready-made goods, **Piece Goods, Drapery, etc.** drapery, and apparel. The imports of these were estimated in 1909 at a value of £12,528,453 as compared with £10,531,410 in 1908, £11,615,497 in 1907, and the exports at a value of £15,284,987 in 1909 as compared with £11,533,343 in 1908. This increase in the exports is nearly all due to increased quantities and increased prices of the linen goods exported.

With regard to the imports of piece goods, drapery, apparel, etc., these are of a much more wide and varied character than the exports. The largest import is of drapery and apparel, the combined value of which was estimated at £5,653,474 in 1909, as compared with £4,897,223 in 1908; £5,547,790 in 1907, £5,117,673 in 1906, and £5,671,069 in 1905. The import of cotton goods was greater than in 1908, and was estimated at a value of £3,980,367 in 1909, as compared with £2,985,704 in 1908; £3,292,542 in 1907, £3,267,626 in 1906, and £2,240,434 in 1905. The imports of woollen goods, including blankets and carpets, were estimated at £1,182,830 in 1909, as compared with £1,129,194 in 1908; £1,130,997 in 1907, and £1,232,552 in 1906. Altogether, apart from drapery and apparel, the quantities of cotton, linen, woollen, and silk goods imported in 1909 were estimated to amount to a sum of, approximately, £6,362,000. In the case of cotton goods imported, a considerable quantity is imported for purposes of further manufacture, and is then re-exported.

In addition to the above classes of finer textile fabrics, there are large imports of coarser stuffs, such as bags, and bagging, oil-cloth and canvas goods. The total value of textile goods imported in 1909, excluding yarns, etc., is thus estimated, as stated above, to amount to £12,528,453.

In the case of exports, the outstanding feature is the fact that three-fourths of the textile piece goods exported are returned as "linens," but this term in the returns of the portal authorities has a wide significance, and includes "unions" and goods which have only a "linen finish." The estimated value of exports of linen goods amounted to £11,996,663 in 1909, as compared with £8,508,107 in 1908, £9,904,703 in 1907, and £9,133,691 in 1906. The returns show an increase in the value of the exports of woollen

goods from £468,103 in 1908 to £523,033 in 1909, but imports are still largely in excess of exports. The total value of the exports of piece and made-up textile goods was estimated in 1909 at £15,284,987.

The second group is that of leather and leather manufactures. Attention has already been drawn to the very large export of hides and skins, and the still greater import of leather, saddlery, boots and shoes. The export of hides and skins in 1909, apart from the hides and skins of the live stock exported, amounted to an estimated value of £614,106, as compared with £486,754 in 1908. On the other hand, the import of leather was of a value estimated at £599,321 in 1909, as compared with £531,933 in 1908; £495,795 in 1907, £558,366 in 1906, and £495 446 in 1905; and the imports of boots and shoes were of a value estimated at £1,791,908 in 1909, as compared with £1,750,937 in 1908, £1,728,178 in 1907, £1,696,294 in 1906, and £1,544,917 in 1905. In addition to these sums there are the imports of saddlery, of leather belting, and of an item which is considerable, but which cannot be ascertained from the existing returns, leather and kid gloves. Thus the total imports of leather and of leather manufactures in 1909 may be estimated at, approximately, £2,400,000.

Large quantities of india-rubber goods are also imported, but it is very difficult to determine the extent and value of this import. It is estimated at £340,885 in 1909, as compared with £374,096 in 1908, £311,863 in 1907, and £301,005 in 1906.

The third group is that of metals and metal articles, machinery, ships, etc. This group is a very wide class, and in gross annual value is next in importance to the textiles. It is estimated that in 1909 the total value of the imports of metals and metal manufactures exceeded £6,000,000, while the exports, which include the export of steam vessels, were estimated at £3,234,767. Among the metal imports, approximately, £1,650,000 consisted of steel, bar and wrought iron, and plates and sheets, imported chiefly into Belfast, while anchors and chains, bolts, rivets, nails and screws, rails, iron chairs, and other railway plant, represent a further import estimated at, approximately, £436,000. Thus the more simple articles of iron and steel manufactures represent a total import in 1909 of not less than £2,084,000. Of the other metals, the import of copper was estimated, in 1909, at £131,036; lead at £75,690, brass and bronze at £62,580. With regard to the more highly manufactured classes of goods, the returns show very large imports of hardware utensils and implements, as well as of the heavier iron goods, such as ranges, stoves, meters, pumps, boilers and cylinders. The total value of these and similar articles in 1909 was estimated at £1,656,132. In addition, there are imports of machinery, chiefly agricultural and textile, and railway engines, estimated at £1,218,480, and of cycles and motor cars, estimated at £490,000.

As regards exports, considerable quantities of machinery are shipped from Belfast, while the export of steam vessels is of a very large annual value, estimated in 1909 at, approximately, £2,175,000. Thus there are large individual exports in this class, but as a whole the trade in hardware and metal goods and manufactures stands in contrast to the textile trade. For whereas the value of the textile exports appears even greater than that of the imports there is a very large surplus of metals and metal manufactures imported over what is exported.

Of wooden manufactures also there is a very large import and only a small export. The item of greatest importance among the imports is furniture, though there is a difficulty in distinguishing removals of private furniture from what are genuine trade imports and exports. But, taking the total import and total export figures of furniture, the imports exceed the exports by a balance of close on £321,000, as compared with £293,000 in 1908. There is also a wide range of other classes of imported articles wholly or partly of wooden manufacture.

There is a very large annual import into Ireland of paper, stationery, cardboard, books and printed matter, estimated for the year 1909 at a total value of £1,085,401, as compared with £1,093,404 in 1908, £1,062,213 in 1907, £1,002,863 in 1906, and £989,142 in 1905. The estimated value of imported paper in 1909 was £566,965; stationery, £187,400; showcards, strawboards, etc., £148,926; books, approximately, £90,000. The exports of paper, cardboard, books, etc., in 1909, were estimated at £356,668, as compared with £357,126 in 1908, £322,939 in 1907, £318,176 in 1906, and £306,648 in 1905. The excess of imports over exports in paper, stationery, cardboard, etc., is thus very large, amounting in 1909 to an estimated value of over £729,000, and in 1908 to over £736,000, and is one of the features of Irish trade which deserve particular attention.

Another class of imports which reaches a considerable annual value is that of the manufactures of clay, china, and glass goods. The total value of the imports of these goods was estimated in 1909 at £846,531, as compared with £812,002 in 1908, £884,644 in 1907, £839,122 in 1906, and £800,983 in 1905. In 1909 the import of bricks and tiles was estimated at £77,978; fire-clay, earthenware, and china goods at £268,983; glass, glassware, and bottles at £306,387; cement at £193,183. The contrast between the large import of these various classes of goods estimated at £846,531, and the export, estimated at £23,579, is very striking.

A further group of articles of great interest is that of chandlery, including under this heading such goods as candles, soap, starch, matches, oils, paints, polishes, etc. Many of these articles are being manufactured in Ireland, and to some extent exported, but in this class of goods also there is a very considerable excess of imports

over exports. The articles to which attention may be specially directed are as follows:—In 1909, candles imported, £93,114; exported, £6,548; soap imported, £203,099; exported, £41,883; starch imported, £47,742; exported, £1,775; paints and varnish imported, £198,734; exported, £16,144; matches imported, £89,199; exported, £826. There is also a very large import of oils, chiefly petroleum and paraffin, estimated in 1909 at £1,060,209. Altogether this class of goods represents in 1909 an import of a value estimated at £1,851,778, the exports being estimated at £115,650.

The total value of chemical, drugs, fertilisers, and dye stuffs imported in 1909 is estimated at £1,123,147, as compared with £1,202,403 in 1908. In the case of drugs and chemicals, goods of this class are frequently sent in small consignments, and the figures submitted in the tables, both of quantity and value, are in all probability considerably lower than the actual quantities and values imported. As regards artificial fertilisers, there is a large import, the estimated value in 1909 being placed at £605,719. There is also a considerable export, estimated in 1909 at £164,070. Dye stuffs imported in 1909 were of a value estimated at £32,070.

The above analysis indicates briefly the extent and character of Irish trade. With regard to the question of the source or “country of origin” of the imports and the final destination of the exports, as stated in previous Reports, the existing returns furnish little information. The trade which passes directly between Ireland and colonial and foreign countries is known, and the more important details as regards this trade at the chief ports in Ireland are presented annually by the Board of Customs in their Statement of the Trade of the United Kingdom. The direct imports of foreign and colonial goods into Ireland during 1909 amounted to a value of £15,590,484, whereas the direct exports amounted to £2,255,770, of which £1,186,915 consisted of re-exports of foreign and colonial goods. But as regards the indirect colonial and foreign trade of Ireland which passes to and from the Irish ports via those of Great Britain, especially Liverpool and London, there are at present no means of distinguishing this from the colonial and foreign trade of Great Britain. Consequently the total trade of Ireland with countries outside of Great Britain cannot at present be ascertained.

At the same time, after examining carefully the quantities of goods shipped across Channel into and from Ireland, and as a result of inquiries made amongst traders, it is estimated that not more than one-fifth of Irish exports goes to colonial and foreign countries, the other four-fifths remaining in Great Britain; and while it is much more difficult to ascertain what proportion of imports into Ireland are of colonial or foreign origin, it seems probable that at least one-third are articles of such origin, the remaining two-thirds being the produce of Great Britain.

With regard to the total extent of the Irish import and export trade, the imports per head of population, according to the present returns, amount to £14 12s. 6d., and the exports per head of population to £14 2s. 4d.; or if the estimated value of re-exports is excluded, the imports amount to a value of £14 0s. 2d. per head of population, and the exports to £13 10s. 0d. per head of population. It is of interest to compare these amounts with the corresponding figures of the foreign trade of the chief industrial States as shown in the following table:—

STATEMENT showing for the year 1909 or latest available year the estimated Population and the Value per head of Population of the Foreign Trade of the undermentioned countries:—

COUNTRY.	Estimated Population.	Thousand £'s (000's omitted).		Imports per head of Population.	Exports per head of Population.

* Excluding re-exports estimated at £2,700,000.

As has been pointed out in preceding reports these figures indicate the wide difference which there is in the extent of foreign trade of different countries as measured per head of population. In some States, especially those of wide area and varied climatic conditions, the extent of foreign trade in proportion to the total production of the country is small. Thus

it is that the United States of America, with a very great internal trade, has, per head of population, a small foreign trade; thus also Germany, with its great agricultural and industrial capacity for production, has a comparatively limited foreign trade per head of population. In all such cases increase or decrease in imports or exports is a very subordinate factor in the industrial progress of the country, and the growth of wealth depends chiefly on internal development and internal trade, and not on the exchange of commodities with other nations. On the other hand, countries which are small in size and with good maritime communication have in general a large foreign trade. Thus it is with Denmark, Belgium, and Holland; thus also with Ireland.

This consideration has a very direct bearing on the question of the present returns. For the larger the foreign or external trade is in proportion to the internal trade, the greater to such a country is the importance of having as full and accurate as possible a record of this external or foreign trade. The necessary data available on which to form a complete estimate of the total annual production of agriculture and industry in Ireland are not as yet available, but there is evidence sufficient to warrant the conclusion that in proportion to the total annual production and output of the country the external or import and export trade is very large. That being so, it is most important to have as full and reliable a record of this trade as is possible. Such a record is of great industrial and commercial value, and this commercial purpose is the main value of trade statistics such as are submitted in the present Report. As regards the wider inferences of national gain or loss, these require the evidence of much more complete data.

The references in the Consular Reports to Irish trade in 1909 have been brought together as in the Reports
Appendices and for the years 1905, 1906, 1907 and 1908, and are
Diagrams. reprinted in the first Appendix. They represent only the references to be found in the Consular Reports so far published, dealing with the year ending 31st December, 1909. A table has also been included in this Appendix showing the imports from Ireland into the United States of America, and the exports from the United States to Ireland for the year ending June 30th, 1909. These figures were abstracted from tables 3 and 6 of the Annual Report on Commerce and Navigation of the U.S.A. for the year 1909, which have been recently issued, and which now show for the first time the trade with Ireland as distinguished from that with England and Scotland. In the second Appendix a table is presented showing the quantities and values of imports of the chief articles of agricultural and horticultural produce into the United Kingdom from British possessions and from foreign countries, and the corresponding exports from Ireland to Great Britain.

Three diagrams are also attached to the Report showing (I) the monthly shipments of fat and store cattle to Great Britain from Ireland, and the monthly arrivals of fat cattle into the United Kingdom from places abroad; (II) the monthly export of butter from Ireland and the monthly import of butter from foreign and colonial countries into the United Kingdom; and (III) the monthly export of eggs from Ireland, and the monthly import of eggs from foreign and colonial countries into the United Kingdom.

From the first diagram it will be seen that in 1909 the monthly export of fat cattle from Ireland was lowest in June and highest in November. The months July to December are those of the heaviest shipments, while April, May, and June are the lowest months. In the store trade the exports from Ireland rose steadily from January to April. In May there was a decline, followed by small shipments in June and July, and then by a rapid and continuous rise from August to October. The heaviest shipments of stores were in October, the next largest monthly export being in September. The monthly imports of fat cattle from foreign countries are, on the whole, remarkably even throughout the year. If reference is made to the diagrams included in the reports on the years 1907 and 1908, the striking similarity between the series of curves showing the monthly exports of fat cattle from Ireland from year to year will be noted. the curves rising and falling at the same periods in each year. A similar uniformity exists in the curves showing the monthly exports of store cattle from Ireland. The corresponding curves of monthly imports of fat cattle into the United Kingdom from abroad not only do not show any such uniformity, but are most irregular.

From the second diagram it will be seen that the Irish export of butter in 1909 reached its height in the month of July. The shipments returned for that month amounted to 126,111 cwts. June was the second highest month of output, amounting to 113,497 cwts., August the third month, September and October the fourth and fifth. The point of greatest increase in the output was between the months of May and June, the output for May amounting to 60,127 cwts. only. The comparison of the monthly export of butter from Ireland and the monthly import from Denmark is of very practical interest, especially with regard to the monthly average of Irish Creamery Butter prices indicated by the prices line in the diagram.

From the third diagram, showing the exports of eggs, it will be seen that March, April and May were the months of heaviest export. The output, which rose rapidly from January onwards, fell away again after the month of April, and from May onwards there was a steady decline in the output until December, which marks the lowest point in the year. The fact also that Irish supplies are heaviest in the markets in the months when prices are lowest is plainly shewn by a comparison of the lines indicating respectively the movement of prices and

the changes in supplies. As in the case of fat and store cattle a remarkable similarity exists in the curves representing the monthly exports of butter and eggs from year to year, and unfortunately in each case the months of largest Irish shipments are usually the months when prices are low, and the months of lowest Irish shipments are the months of highest prices.

In conclusion, I desire to acknowledge gratefully the assistance given by the port and harbour authorities of Ireland, the railway and shipping companies, and by many individual importers and exporters. I am also specially indebted to the Principal of the Statistical Office, Board of Customs, and to the Comptroller-General of the Commercial, Labour, and Statistical Department of the Board of Trade, for much information which they have kindly afforded.

I am, Sir,

Your obedient Servant,

W. G. S. ADAMS,

*Superintendent of Statistics and
Intelligence Branch.*

APPENDIX I.

Extracts relating to Irish Trade with Foreign Countries, taken from the Consular Reports of the undermentioned Countries for the year 1909.

EUROPE.

AUSTRIA-HUNGARY.

No separate statistics are published relative to trade with Ireland.

FRANCE.

Bordeaux.—No direct imports from Ireland are recorded. Exports direct to Ireland consisted in 1909 of plums, walnuts, syrups and bonbons, resinous produce, wine, brandy and vinegar, fresh fruit, cask hoops and soap. An increase of wine from 6,052 gallons in 1908 to 21,032 gallons in 1909 is unprecedented, and can only be accounted for by assuming that the customs statistics record some error in the declaration of quantities exported.

Tonnay-Charente.—The quantity of brandy sent for consumption in England, Scotland and Ireland is decreasing every year.

ITALY.

Genoa.—Imports from Ireland do not come direct, but by way of the United Kingdom, so no separate returns can be given for such imports, as they are included in the customs returns as coming from the United Kingdom.

There is, I understand, a scheme on foot to establish in Genoa an agency for the sale of Irish products, more especially lace, handkerchiefs, linen and similar products, and when this undertaking is firmly established I shall furnish the names and address of the principals to the Commercial Intelligence Branch of the Board of Trade.

Turin.—Irish handkerchiefs, especially white and printed cotton mercerised, find a good sale in Piedmont, but I note that several manufacturers are now selling direct to the small retailers instead of almost exclusively dealing with the wholesale firms as they used to do. I am of opinion that this new way of doing business will prove very unsatisfactory, and it would have been much better if manufacturers had continued to sell only to wholesale firms, as these buy in large quantities and pay at 30 days. As matters now stand I am afraid that most of the wholesale firms will give up buying these handkerchiefs, and it remains to be seen whether a profitable turnover can be obtained by selling direct to the retailers.

Sicily (Marsala).—There have been no imports from Ireland, and Marsala wine is the only article exported there.

PORTUGAL.

Madeira.—The consumption of Irish whiskey is small; and in many of the retail wine shops it is not on sale.

Mozambique.—I have been unable to identify among the articles shown in the import lists any of Irish manufacture.

ROUMANIA.

Two British steamers left direct for an Irish port (Belfast) grain laden during the year 1909; no British ships arrived from Irish ports.

RUSSIA.

Batoum.—No Irish goods were imported to the Caucasus during the year 1909.

AMERICA.

PERU.

There is very little trade with Ireland, and this consists of Belfast linen and ginger ale.

UNITED STATES.

New York.—The following is a summary of Ireland's trade with the port of New York during the year 1909:—

Imports	£3,093,658
Exports	197,824
Re-exports	292

Charleston.—The total of imports direct from Ireland last year was valued at only 5 dol. (£1 10s.).

Galveston.—Of the goods, valued at £3,063, imported from Ireland malt liquors accounted for £2,541 and whiskey for £28. The principal commodities exported from Galveston to Ireland during the year 1909 were:—

		£
Flour, brls.,	16,928	17,802
Logs	—	449
Lumber assorted	—	197
Staves, number,	55,959	1,224
Maize, bushels,	217,024	30,433
Wheat, „	64,000	14,522
All other articles	—	839

Porto Rico.—Imports from Ireland.—Amongst these imports figure biscuits, ginger ale and linen.

San Francisco.—Trade with Ireland.—It is impossible to furnish statistics of the trade with Ireland, as the bulk of the consignments come from New York and are entered at the custom-house there. The principal article imported into this district is linen; whiskey and ginger ale also enter in small quantities.

Savannah.—There were only 212 dols. worth of articles imported from Ireland during the year 1909.

The following tables (pp. 113-120) extracted from publications issued by the Bureau of Statistics, Washington, show the imports and exports into and from Ireland from and into the United States during the twelve months ended 30th June, 1909. The tables, however, do not cover the whole trade between Ireland and the United States. Goods manufactured or produced in Ireland, sold to firms in England, and by them exported to the United States, are, as a rule at least, accredited in the reports of the Bureau to England and not to Ireland.

TOTAL VALUE OF TRADE BETWEEN IRELAND AND THE UNITED STATES

GOVERNMENT PUBLICATIONS.

1. **Government Publications** (with the exceptions mentioned in paragraphs 2 to 6) can be bought, either directly or through any bookseller, from—
WYMAN AND SONS, LTD., Fetter Lane, London, E.C. ; or
OLIVER AND BOYD, Tweeddale Court, Edinburgh ; or
E. PONSONBY, LTD., 116, Grafton Street, Dublin.
Booksellers, and the accredited agents of Free Public Libraries, are entitled to a discount of 25 per cent. from published prices.
2. **Hydrographical Publications of the Admiralty** are sold by—
J. D. POTTER, 145, Minories, London, E.C.
3. **Patent Office Publications** are sold at—
The Patent Office, 25, Southampton Buildings, Chancery Lane, London, W.C.
(N.B.—Classified Abridgments of Patent Specifications are sold also by Wyman and Sons, Ltd.)
4. **Ordnance Survey and Geological Survey Publications** can be purchased from—
The Director General of the Ordnance Survey, Southampton ; or,
The Superintendent, Ordnance Survey, Dublin ; or
Agents in most of the chief towns in the United Kingdom.
(N.B.—**Small Scale Maps** are, as a rule, procurable at Railway Bookstalls in England and Wales.)
5. The **Journal of the Board of Agriculture** is published monthly by the Board, at 4, Whitehall Place, London, S.W. Price 4d.
6. The **London Gazette** is published on Tuesday and Friday evenings by Wyman and Sons, Ltd. Price 1s.

The following is a list of some of the more important Parliamentary and Official Publications recently issued:—

Statutes—

<i>Public General Acts, Local and Personal Acts, 1911.</i>	In separate Acts, at varying prices.
<i>Public General, Session 1910. With Index, Tables, &c. Cloth.</i>	... 3s.
<i>Second Revised Edition. 1235–1900. Vols. I. to XX.</i>	... 7s. 6d. each.
<i>Statutes in Force. Chronological Table and Index of.</i>	26th Edition. To the end of the Session 10 Edward VII. and 1 Geo. V. (1910). 2 vols. ... 10s. 6d.
<i>Interregnum, 1642–1660. Acts and Ordinances of the.</i>	In 3 vols. (not sold separately). 30s.
<i>Acts of the Parliaments of Scotland, 1424–1707. Revised Edition.</i>	... 10s.
<i>Statutory Rules and Orders other than those of a Local, Personal, or Temporary Character.</i>	Issued in 1890 to 1910 ... 10s. each.
<i>Statutory Rules and Orders revised, in force on Dec. 31, 1903. Vols. I. to XIII.</i>	10s. each.
<i>Statutory Rules and Orders in force on 31st December, 1909. Index to</i>	... 10s.
PARLIAMENTARY DEBATES. House of Lords and House of Commons ; each daily part 3d. ; also issued in bound volumes with Index.	
MINUTES OF PROCEEDINGS OF THE HOUSE OF LORDS.	1d. per 4 pp. Subscription, Session 1911, 30s.
VOTES AND PROCEEDINGS OF THE HOUSE OF COMMONS.	1d. per 8 pp. Subscription, Session 1911, 30s.
HISTORICAL MANUSCRIPTS. Reports of the Royal Commissioners. In course of issue.	
RAILWAY CONCILIATION SCHEME OF 1907. Royal Commission. Daily Evidence,	... 1s. each.
NATIONAL INSURANCE AGAINST LOSS OF HEALTH, UNEMPLOYMENT, &c. Bill 198 ; and amended clauses 1–17	... 11½d.
Do. Memoranda ; Reports of Actuaries, German Insurance, &c. (nine papers)	4s. 2½d.
ELECTRICITY IN MINES COMMITTEE. Report, Evidence, &c. [Cd. 5498, 5533.]	... 2s. 2d.

DUBLIN CASTLE,

13th November, 1911.

SIR,

I have to acknowledge the receipt of your letter of the 10th instant (G. 4262-11), forwarding, for submission to His Excellency the Lord Lieutenant, the Report on the Trade in Imports and Exports at Irish Ports for the Year 1910.

I am,

Sir,

Your obedient Servant,

J. B. DOUGHERTY.

The Secretary,

Department of Agriculture
and Technical Instruction,
Dublin.

REPORT ON THE TRADE
IN
IMPORTS AND EXPORTS AT IRISH PORTS
DURING THE YEAR 1910.

TO THE SECRETARY OF THE DEPARTMENT OF AGRICULTURE AND
TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the Seventh Report on Irish Imports and Exports dealing with the year ended 31st December, 1910.

The First Report of this series was for the year 1904.

As has been explained in previous issues these Reports have been subject to serious difficulties in collection and classification of information, but steady progress has been made in improving the contents of the returns. A considerable advance has been made since the issue of the first Report in the completeness of the returns, and owing to the general co-operation received from the Irish harbour boards and shipping companies engaged in Irish trade the present tables now represent close on 100 per cent. of the gross quantities of Irish imports and exports. But while the gross quantities of the trade are thus known the description of goods in regard to many consignments is still general and inadequate. Accordingly it should be clearly understood that these returns furnish a record of the import and export trade of the country which is only approximate, and claims to be neither complete as regards quantities nor exact as regards values.

In view of the importance of this consideration I desire to submit again a statement as to the present sources of information and the limitations which affect the reliability of these statistical returns.

From 1825, when the system of separate Customs was abolished, no record has been kept until recent years as to the trade between Great Britain and Ireland. Occasional returns were forthcoming regarding the quantities of particular articles imported or exported, but such information was slight and affords small clue to the changes which have taken place during the past 86 years. Since 1878 records exist with regard to the numbers of live stock exported from and imported into Ireland, but this is almost the only part of the cross-Channel trade of which a systematic account has been kept. In the case of foreign trade, the principal articles of the direct trade between Irish ports and the Colonies and foreign countries have been published for many years by the Board of Customs in their

Annual Statement of the Trade and Navigation of the United Kingdom. But the extent of this direct Irish foreign trade is very small, and amounts to 12 per cent. of the total external trade of Ireland with Great Britain and other countries.

On undertaking the work of compiling a comprehensive statement of Irish imports and exports, the Department, having no statutory authority to require returns of imports and exports, found that the only materials of information available as to the external trade of Ireland were those contained in the "manifests"—shipping documents in which are entered the items of cargo and their weight. Arrangements were accordingly made with the several port and harbour authorities, and in other cases directly with the shipping companies, to secure records, based on these manifests, as to cargoes landed or shipped at Irish ports, excluding such cargoes as are simply carried from one Irish port to another. But the ship's manifest is itself in three respects a very imperfect source of information—first, as regards the description and classification of goods; second, in respect of their net weight or measure, and third, as to the money value of the goods. First, the description of certain classes of goods, especially manufactured articles, is general and indefinite. Thus, typewriters, sewing machines, bicycles, and gas engines are in many cases entered in the manifests as "machinery." Similarly, goods widely varying in character and value are returned under the general heading of "drapery." This defect, which makes accurate returns for such classes of articles impossible, is due to the fact that the description of goods entered in the manifest is made with a view to the rate-book, in which a system of general classification is necessary, whereas in a statement of imports and exports accurate particulars are of the greatest importance. Second, while the manifest generally furnishes a statement as to the weight of goods, the weights are in most cases gross, and, consequently, in estimating values, allowance has to be made for tare and packing. This is not an easy matter, especially in respect of the imports of manufactured goods. Third, the manifests contain no statement of the value of the goods, and the shipping companies and harbour authorities are unable to state the value. As, however, it is of great importance that not only the quantity but also the money value of the several imports and exports should be stated, an official estimate of values has to be made. In forming such estimates careful inquiries have been carried on from year to year among importers and exporters as to the character and value of the goods entered under the different headings, while the values of goods shown by the Board of Customs in their Annual Statement of Trade, and the current prices, as reported on authoritative market lists during the year, have also been consulted. But no matter what care is taken in making such supplementary inquiries, the work of valuation remains one of very considerable difficulty, and the absence of declared values is a serious defect in such returns. For, even though declarations of value may not in all cases be relied upon, in most cases such values are given truly, while by means of a proper system of scrutiny errors and wrong declarations can be to a large extent checked. Declared values, where properly supervised, are better than the best system of official values.

In view, therefore, of these defects in the original documents of information, it cannot be too plainly stated that these Reports do not furnish an adequate account of the external trade of Ireland, and that if full and accurate returns are to be obtained it is necessary to establish a system which will insure that (1) the description, (2) the weight or measure, and (3) the value of goods whether imported into or exported from Ireland shall be clearly declared by the consignors or consignees.

While, however, the present returns are thus limited as regards completeness and accuracy, much information, sufficiently approximate to be of great practical value, has been obtained. First, the present series of returns furnishes a far more complete record than has been hitherto available as regards the total quantity and value of goods entering or leaving Irish ports, and has shown that the external trade of Ireland is much greater in extent and more representative in character than was hitherto believed. Second, in the case of agricultural produce, raw materials, and many of the more simple articles of manufacture, a fairly reliable approximation to the actual quantity and value imported and exported can now be made. Third, even with regard to the percentage of trade (approximately 25 per cent. of the total trade), in which the returns describe inadequately the classes of goods, and as to which the estimated values are liable to serious error, careful inquiries have been made, in which many exporters and importers have most generously facilitated the work of the Department, so as to reduce the possibilities of error and to ascertain as closely as possible the average value of these imports and exports. Fourth, it should be added that the returns have brought home the practical importance to Irish trade and industry of a system which will secure regular and reliable information with regard to the imports and exports of the country.

In the tables and figures herewith submitted, as explained in previous issues in this series of Reports, Irish imports and exports mean all goods imported or exported by Ireland, whether from or to Great Britain, the Colonies, or foreign countries—the terms including not only the Colonial and foreign, but also the Cross-Channel trade between Great Britain and Ireland. The import and export trade is thus the sum of three things: (1) the direct trade between Ireland and all other countries outside of Great Britain; (2) the indirect trade of Ireland with these same countries *via* Great Britain; and (3) the local trade between Ireland and Great Britain.

As a result of inquiries which have been carried on each year since the figures for 1904 were published, a more accurate estimate can now be made regarding the values of certain classes of produce imported and exported during these years. In all such cases the figures have been revised. Where also information has been obtained as to imports and exports, regarding which no record was available when the previous Reports were published, an estimated allowance has been added for such trade. The figures have in this way been kept as strictly comparable as possible

The total import and export trade at Irish ports in 1910 is estimated at £130,888,732 as compared with £124,725,895 in 1909, an increase of £6,162,837. The imports amounted to a total of £65,044,477 and the exports to a total of £65,844,255. The increase in the estimated value of the trade in 1910 as compared with 1909 has taken place both in imports and exports, the increase in imports amounting to £1,264,768 and in exports to £4,898,069. The following statement shows the total estimated values of imports and exports in the seven years 1904-1910:—

			Imports.	Exports.	Total.
			£	£	£
1904	54,078,399	49,712,400	103,790,799
1905	55,631,692	51,341,351	106,973,043
1906	57,295,007	55,913,933	113,208,940
1907	61,457,558	59,115,197	120,572,755
1908	58,847,329	57,273,289	116,120,618
1909	63,779,709	60,946,186	124,725,895
1910	65,044,477	65,844,255	130,888,732
1910 over 1904	10,966,078	16,131,855	27,097,933
„ „ 1905	9,412,785	14,502,904	23,915,689
„ „ 1906	7,749,470	9,930,322	17,679,792
„ „ 1907	3,586,919	6,729,058	10,315,977
„ „ 1908	6,197,148	8,570,966	14,768,114
„ „ 1909	1,264,768	4,898,069	6,162,837

It will be seen that while the values of both imports and exports have shown an increase each year since 1904, with the exception of the year 1908, the exports have increased more rapidly and in 1910 for the first time, were greater than the imports.

From these figures it will be seen that the trade of 1910 shows a marked improvement on 1909, and exceeds the records of any of the preceding years. In considering, however, the increases and decreases in trade during the years 1904-1910 it should be noted that the rise and fall in the total value of imports and exports is to a considerable extent due to the rise and fall in the price of commodities. In the last seven years there have been considerable changes in the prices of the chief articles which make up the import and export trade of Ireland. Prices rose during 1905, 1906 and 1907. On the other hand, in 1908, prices in most commodities were lower than in 1907 though still remaining on the average slightly higher than in 1905 and 1906 and considerably above 1904. In 1909 prices again showed an advance, which was continued in 1910. Thus if prices had remained the same as they were in 1904, the increases in the total values of imports and exports for the year 1910 over the preceding years would have been—

1910 over 1904	£11,249,405	instead of	£27,097,933
„ „ 1905	8,479,104	„	23,915,689
„ „ 1906	5,481,170	„	17,679,792
„ „ 1907	2,892,398	„	10,315,977
„ „ 1908	5,984,805	„	14,768,114
„ „ 1909	2,238,790	„	6,162,837

If the years 1909 and 1910, are compared on the assumption that the prices in 1910 remained the same as in 1909, the increase in the value of imports would have amounted to £76,037 instead of £1,264,768, and in the value of exports to £2,162,753 instead of £4,898,069. But figures which are based on current prices, and thus allow for the change in value as well as in volume, remain the best index of the commercial importance of Irish trade.

It will also be remembered that the figures in the tables of imports and exports include not only articles imported for home consumption but also consignments which have been returned or re-exported without going through any process of manufacture, as with the present restricted means of information it is not possible to distinguish imports or exports from what are strictly speaking returned exports or returned imports. But, as has been pointed out in previous reports, this trade is a small proportion of the total Irish trade. In the case of certain articles such as tea, coffee, sago, it is evident that the quantities exported represent re-exports, which it may be assumed have undergone no change, and are either being returned or in certain cases re-distributed. In respect of other articles, however, such as leather, apparel, machinery, etc., it is a matter of considerable difficulty to ascertain, even approximately, the proportion of (a) goods which are re-exports or returned goods, (b) goods which having been imported and having undergone some process of manufacture are then exported, and (c) goods which are largely or wholly the product of Irish industry. Making as careful an estimate as existing information permits it would appear that in 1910 goods to the value of approximately £2,400,000* may be taken to have been returned or re-exported without undergoing any process of manufacture. Deducting this sum from the totals of imports and exports respectively it leaves in 1910 for the purposes of Irish consumption and manufacture a net total import of approximately, £62,644,477, and a net Irish export of approximately, £63,444,255, the total Irish trade, excluding re-exports, amounting in 1910 to £126,088,732. The corresponding figure for 1909 was £119,325,895. The re-imports are small.

*The main articles contributing to this total figure are :—Wines, foreign and colonial spirits, guns and rifles, butter, chemicals, dyes and tanning substances, glass and glassware, maize, hops, Indian meal, rice, sago, etc. ; boots and shoes, indiarubber goods, musical instruments, machinery and hardware, oils, paints, sponges, sugar, tea, raw cotton, piece goods, haberdashery, unmanufactured tobacco. The largest re-export is raw cotton, almost all of which was shipped from Belfast, the value re-exported in 1906 being £704,320 ; in 1907, £1,253,894 ; in 1908, £1,473,771 ; in 1909 £1,243,495 ; and in 1910, £904,032.

Gross Total ..	55,913,933	59,115,197	57,273,289	60,946,186	65,844,255

In order to indicate briefly the main divisions of the trade the preceding summary has been adopted, showing respectively the various classes of (1) farm produce, food and drink stuffs, (2) raw materials, and (3) manufactured goods. Any such classification has drawbacks. There are certain goods which might be placed in one class or another. Thus hides and skins, wool, flax, etc., which are farm produce, are classed under raw materials. Thus also a number of articles in the first group, *e.g.*, butter, bacon, wines, ales, spirits, tobacco, etc., have undergone varying degrees of manufacture and might be classed as manufactured imports and exports. But the present division is simple, well known, and of practical interest, and with the particulars set forth in the accompanying tables it is easy to re-arrange the groups for other purposes of comparison as may be required.

These summary tables show that the percentages of the three classes which make up the total values of imports and exports were in 1910 as follows :—

	IMPORTS.	EXPORTS.
(1) Farm Produce, Food and Drink Stuffs	36	54
(2) Raw Materials	15	6
(3) Manufactured Goods	49	40
<hr/>		
Total ..	100	100

It will be seen from the summary tables that in the case of imports the increase in 1910 has taken place in raw materials and in manufactured goods while there has been a decrease in farm produce imported. The decrease in farm produce has taken place largely in respect of maize and bacon, the imports of maize alone being less in value than those of 1909 by almost £700,000. In manufactured goods the increase has taken place chiefly in respect of the goods classified as piece goods, apparel, drapery, etc., the imports of which exceed those of 1909 by an estimated value of over one and a quarter millions sterling.

In the case of exports the value of farm produce exceeds that of the years 1907, 1908 and 1909, and is considerably over the exports of earlier years. In raw materials there is a marked decrease in the value of lard and wool exported and of raw cotton, which of course, is a re-export. It is, however, in the group of manufactured goods that the increase in exports is mainly seen. Owing to high values and large shipments the exports of textile piece goods exceed by 2 millions sterling those of 1909, and by nearly 6 millions sterling those of 1908. Besides the value of the exports of ships, machinery, and implements is higher than that of any year since 1904.

Following the classification in the above summary attention is directed to the main groups and the articles of chief importance in them.

I.—FARM PRODUCE, FOOD AND DRINK STUFFS.

The group of farm produce, food and drink stuffs represents an import and export amounting in 1910 to £58,789,083 out of a total of all imports and exports estimated at £130,888,732. It is important to note that a very large proportion of even the imports into Ireland consist of agricultural produce, bacon, eggs, poultry, butter, grain, flour, food stuffs, fruit, and vegetables. And if to these articles are added flax, hides, wool, skins, etc., which are included under raw materials, the total import of farm produce alone almost reaches 22 millions, marking a slight decrease on the preceding year in these commodities. This feature of Ireland's trade deserves close attention, as it is significant that this country with its agricultural capacity and potentiality should be annually importing so great a quantity of farm produce, much of which it is admirably suited to raise at home.

In the case of exports from Ireland, live stock, bacon and hams, butter, poultry, eggs, oats, potatoes, vegetables, and flax, etc., together with the products of the live stock industries, such as hides, skins, wool, feathers, etc., amount to a value altogether exceeding 32 millions sterling or half the total exports of Ireland. Large as this export is, the fact is seldom realised that Ireland, while exporting annually 30 millions of farm produce and food stuffs is importing other food stuffs and farm commodities of a value of over 20 millions.

The several articles belonging to the large group of farm produce, food and drink stuffs are mostly simple in character, and for this reason the quantities and values in this division as also in that of raw materials represent in all probability the actual extent and value of the trade much more closely than is the case with manufactured articles.

The first and still the chief agricultural export of Ireland is that of live stock amounting in 1910 to a total estimated value of £15,547,713, an increase over the exports of each of the preceding years for which the values have been recorded in this series of reports.

Live Stock.

With regard to the main items in this class in 1910 the export of horses showed an increase as compared with 1908 and 1909, though still below the export of 1906 and 1907. In cattle there was a decrease in the export of fat stock and an increase as compared with 1909 in stores, reaching the highest figure of recent years. The total number of cattle shipped in 1910 amounting to 869,181 was above the export of any previous years excepting 1902 and 1903. There was a heavy export of sheep and lambs in 1910, the shipments considerably exceeding those of each of the preceding five years, with the exception of 1909. On the other hand, in the case of swine the decrease in exports continues, the number exported in 1910 falling to 324,071, the lowest figure on record since 1878, when the published returns of the exports of animals from Ireland were first issued.

The following statement gives the numbers and estimated values of live stock exported in the years 1907, 1908, 1909, and 1910 :—

	Number				Value			
	1907	1908	1909	1910	1907	1908	1909	1910
					£	£	£	£
Horses, ..	33,356	28,804	29,365	31,894	1,541,815	1,347,225	1,369,395	1,492,015

„ Stores, ..	33,329	15,939	10,238	22,495	66,658	31,878	25,595	50,614
Total Swine, ..	481,907	387,476	327,129	324,071	1,636,681	1,332,258	1,451,605	1,332,312

Live stock imports into Ireland are very small, the total estimated value of the same in 1910 amounting to £275,881 as compared with £278,809 in 1909. This figure, it should be remembered, includes a considerable number of horses which are temporarily imported chiefly for sporting purposes and which also swell the export returns. The largest farm stock import is of sheep and lambs, of which 38,736 were imported in 1910 as compared with 30,053 in 1909. A few breeding cattle are also imported.

The exports and imports of dead meat, bacon and hams, game, etc., form also a very important and interesting

Dead Meat. class. In 1910 the total value of these exports from Ireland was estimated at £4,071,570 while the corresponding imports amounted to £2,334,880. During recent years there has been a steady rise in the value of these exports, while the corresponding imports show a tendency to fall, a tendency which has been more marked in 1910 than in any preceding year. The following table shows for the years 1907—1910 the estimated total value of each main class imported and exported :—

IMPORTS.

(a) Poultry is not included here.

(b) It is found that under this heading considerable quantities of bacon and hams are exported. Owing to improved returns, many of these quantities formerly returned under this heading are now definitely specified as bacon or hams.

There are many interesting points to note in this table. As regards imports it will be seen, first, that in 1910 the total of foreign and colonial beef and mutton imported into Ireland showed an increase over 1907, 1908 and 1909; second, that there was a most remarkable falling off in the import of foreign and colonial bacon and hams into Ireland in each of the past two years, the quantities imported in 1910 being only 57 per cent. of the quantity imported in 1908.

With regard to the exports from Ireland there was a very slight decrease in the quantity of bacon and hams as compared with the figures of 1909, but in consequence of the rise in prices the total estimated value showed a considerable increase on the preceding year, the estimated value of these exports in 1910 amounting to £3,691,981. This total exceeded by £1,943,955 the estimated value of the total imports of bacon and hams in 1910. If to this export is added the export of pork and coarse pig meat, the value of the products of the pig exported will amount to nearly £4,000,000 sterling. It is interesting thus to note that, including the export of live pigs, the total export value of pigs and pig produce in 1910 amounted to a sum of over £5,250,000 sterling.

The import of preserved and tinned meat increased in 1910 to £114,023 as compared with £110,299 in 1909, and the export of preserved and tinned meat fell from an estimated value of £18,930 in 1909 to £14,555 in 1910, which is less than the value exported in any year since 1904. Additional quantities of tinned meat are probably shipped under the name of "Provisions and Groceries."

The returns indicate an increase in the export of poultry as compared with 1909. The estimated value
Poultry. exported in 1910 amounted to £927,035 as compared with £857,276 in 1909, £797,376 in 1908, £847,247 in 1907, and £855,176 in 1906. It is estimated that one-third of these values consisted of live poultry.

There was a decrease in the quantity of eggs exported in 1910 as compared with 1909, the total quantity exported
Eggs. being less than in any of the four preceding years, though the figures for 1909 are above those of the years 1904 and 1905.

The following statement shows the quantities and estimated values of imports and exports of eggs during the years 1904—1910:—

Year.			Imports.		Exports.	
			Gt. Hds.	Value. £	Gt. Hds.	Value. £
1904	114,192	37,112	5,738,129	2,044,208
1905	116,380	41,218	6,194,132	2,387,322
1906	99,755	37,408	6,494,532	2,604,578
1907	103,107	41,036	6,675,599	2,781,500
1908	101,999	41,487	6,501,195	2,729,147
1909	81,891	34,805	6,362,714	2,863,221
1910	92,101	39,191	6,227,820	2,744,133

The exports of eggs and poultry together in 1910 amounted to £3,671,168, and if to this is added the export of feathers, amounting in 1910 to £32,460, a total export of £3,703,628 is recorded. These figures do not include the value of the quantity sent by parcel post.*

The imports of poultry and eggs into Ireland are small, amounting in 1910 to £52,687 as compared with £49,208 in 1909. Thus, in estimating the value of the poultry and egg industry to the country, it should be borne in mind that practically the entire home demand is supplied by the home article, and that the export represents the surplus production of poultry and eggs. These facts bring home the great importance and value of the poultry and egg industries to Ireland. Attention is specially directed to diagram III. (see page xxxiv) which shows for the year 1910 (1) the total monthly import of eggs into the United Kingdom from foreign and colonial countries; (2) the quantity of eggs exported from Ireland each month; and (3) the monthly average export price of Irish eggs.

There was again a considerable fall in the quantity of butter exported. The monthly export was less for each of the first seven months of 1910 as compared with 1909, but each of the remaining five months showed an increase as compared with the corresponding month of the previous year. It should be noted that the imports of butter, though trifling as compared with the exports show a distinct tendency to increase, the imports in 1910 being considerably greater than in 1909, while the latter showed a marked increase on those of 1908.

The changes in the quantities and values of butter imported into and exported from Ireland during the period 1904—1910 may be seen from the following table:—

Year.	Imports.		Exports.	
	Cwts.	Value.	Cwts.	Value.
		£		£
1904	59,053	300,924	818,252	3,666,792
1905	57,438	314,234	813,921	4,048,409
1906	60,194	350,128	844,027	4,283,437
1907	63,258	360,571	818,004	4,009,072
1908	62,918	384,287	751,942	4,026,023
1909	68,347	394,867	719,625	3,625,111
1910	77,945	477,798	698,907	3,584,810

* So far as agricultural produce is concerned the parcel post trade is mainly confined to the carriage of butter, eggs, and poultry. Through the courtesy of the Postmaster-General, the Department have been informed that approximately 3,360,000 parcels are posted annually from Ireland to Great Britain, that it is estimated that about 1,120,000 parcels are of butter, eggs, and poultry, and that the average weight of all inland parcels is 2 lb. 10 ozs. Assuming the export of butter, eggs, and poultry by parcel post to have an average weight per parcel of 3 lbs., the export by parcel post of butter, eggs, and poultry would amount to 30,000 cwts.

As in the case of eggs, these figures do not include quantities sent by parcel post. There is also difficulty in obtaining a record of small consignments of butter under 28 lbs. as these are frequently entered in the returns as "parcels" or "sundries." And as there is reason to believe that this class of trade is on the increase the fact may to some extent account for the apparent shrinkage in exports. Attention is directed to the diagram (see page xxxiv) which shows for the year 1910 (1) the imports of butter into the United Kingdom from the Colonies and foreign countries; (2) the quantity of butter exported each month from Ireland; and (3) the average monthly export price of Irish creamery butter.

The quantity of margarine imported in 1910 amounted to 54,376 cwts., valued at £142,737, as compared with 45,680 cwts., valued at £117,626 in 1909. The exports of margarine amounted to an estimated value of £186,753 in 1910 as compared with £169,394 in 1909.

The returns showed an increase in the imports of cheese. The quantity imported in 1910 amounting to 43,560 cwts., valued at £120,879, as compared with 42,611 cwts., valued at £121,441 in 1909; 36,159 cwts., valued at £103,053 in 1908; 44,445 cwts., valued at £128,890 in 1907; and 40,906 cwts., valued at £117,605 in 1906. There was a decrease in the small export of cheese, the quantity exported in 1910 amounting to 3,365 cwts., valued at £9,338 as compared with 4,015 cwts., valued at £11,443 in 1909; 3,231 cwts., valued at £9,208 in 1908; 2,460 cwts. in 1907 valued at £7,134; and 1,222 cwts. in 1906, valued at £3,513.

There was a decrease in the export of fish from Ireland in 1910, the total value of fish, including shell-fish, exported being estimated at £633,669 in 1910 as compared with £724,476 in 1909; £440,461 in 1908; £402,746 in 1907; and £459,215 in 1906. The decrease was very marked in the export of cured herrings, shipped mainly from Londonderry and Downings; the quantity of salmon and trout also showing a decrease. On the other hand the value of fish, including shell-fish, imported in 1910 was estimated at £309,613 as compared with £323,656 in 1909; £277,431 in 1908; £272,849 in 1907; and £258,799 in 1906.

In the summary tables on pp. x. and xi., grain and other foods intended for human consumption have, as far as possible, been distinguished from the feeding-stuffs for animals, as it is important to see the respective amounts of these two kinds of imports. In several cases, however, the imports may be, as in the case of oats or of Indian meal, partly for food-stuffs and partly for cattle feeding, and therefore this division can only indicate broadly the extent of the two classes of imports.

Much the largest import among the grain goods is wheat and wheat flour. The quantities and estimated values imported into Ireland respectively in the years 1904, 1905, 1906, 1907, 1908, 1909, and 1910 were as follows :—

	Wheat Imports.		Wheat Flour Imports.	
	Cwts.	Value.	Cwts.	Value.
		£		£
1904	6,932,956	2,599,857	5,529,278	2,764,639
1905	7,502,728	2,907,307	5,596,214	2,798,107
1906	6,927,827	2,439,172	5,399,355	2,521,187
1907	7,147,511	2,829,223	5,261,607	2,652,726
1908	6,764,866	2,931,442	4,697,156	2,563,865
1909	8,233,011	3,979,289	4,513,657	2,595,353
1910	7,997,988	3,532,445	4,602,990	2,685,078

From these figures it appears that the quantity of wheat imported in 1910 was less than in 1909 but much greater than in any of the five previous years, while the total value of the imports was estimated to be £601,003 higher than in 1908. The imports of wheat flour on the other hand, showed an increase in quantity in 1910, the total amount imported being greater than in 1909 but less than in any of the five previous years, though the total value was higher than in each of the four previous years. In the agricultural statistics of Ireland the amount of Irish-grown wheat in 1910 was estimated at 919,384 cwts., and if it is assumed that one and a-half tons of wheat produce one ton of flour, the total quantity of flour represented by imports of wheat and flour and by home-grown wheat amounted to 10,547,905 cwts. From this quantity has to be deducted an export of flour, or its equivalent in wheat, amounting to 378,997 cwts., leaving thus a residue of 10,168,908 cwts. for consumption in Ireland.

In the case of oats the imports amounted to 452,597 cwts. in 1910 as compared with 583,372 cwts. in 1909; 401,095 cwts. in 1908; 190,049 cwts. in 1907, and 321,207 cwts. in 1906, while the exports amounted to 1,175,241 cwts. in 1910 as compared with 1,249,172 cwts. in 1909; 1,449,111 cwts. in 1908; 1,595,275 cwts. in 1907; and 1,297,925 cwts. in 1906. The imports of oatmeal rose to 169,358 cwts. in 1910 as compared with 134,748 cwts. in 1909; 194,798 cwts. in 1908; 174,185 cwts. in 1907; and 170,984 cwts. in 1906; the exports amounted to 146,526 cwts. in 1910 as compared with 164,998 cwts. in 1909; 150,044 cwts. in 1908; 181,228 cwts. in 1907, and 188,949 cwts. in 1906. But, as was pointed out in previous Reports, in considering the imports of oatmeal, allowance must be made for a quantity of what is returned as “meal,” estimated roughly at one-third, being oatmeal or similar meals for human consumption, the remaining two-thirds of these unclassified meals being cattle meals. The quantities of “unclassified” meals in the imports which diminished from 278,873 cwts. in 1906 to 219,645 cwts. in 1907 to 130,753 cwts. in 1908, rose to 193,590 cwts. in 1909, and fell again to 134,986 cwts. in 1910.

The quantity of barley imported in 1910 amounted to 989,804 cwts. as compared with 1,216,627 cwts. in 1909 ; 1,181,987 cwts. in 1908 ; 1,060,549 cwts. in 1907 ; and 1,043,908 cwts. in 1906. The exports of barley showed a remarkable decrease, the shipments amounting to only 20,515 cwts. in 1910 as compared with 211,891 cwts. in 1909 ; 36,778 cwts. in 1908 ; 29,185 cwts. in 1907 ; and 42,510 cwts. in 1906. The exports of malt also showed a striking decrease, falling to 72,892 cwts. in 1910 as compared with 161,045 cwts. in 1909 ; 79,379 cwts. in 1908 ; and 85,132 cwts. in 1907. The imports of malt amounted to 735,196 cwts. in 1910 as compared with 652,872 cwts. in 1909 ; 808,817 cwts. in 1908 ; and 566,189 cwts. in 1907.

Among feeding stuffs the chief import is maize, a very great quantity of which is annually imported into Ireland. A considerable quantity, however, is each year re-exported—in 1910 to the value of £184,333. The following are the total quantities and values of maize imported in the years 1904—1910 :—

	Cwts.	Value.
		£
1904	13,251,493	3,147,229
1905	11,268,018	2,957,854
1906	13,404,190	3,295,197
1907	15,147,026	4,133,876
1908	10,924,929	3,368,520
1909	12,527,450	3,862,630
1910	11,435,688	3,168,639

Together with the above import of maize, the imports of bran, pollard, and the various classes of cattle meals, brought the total value of feeding stuffs imported in 1910 to a sum estimated at £4,284,055 as compared with £5,007,091 in 1909 ; £4,417,586 in 1908 ; £5,164,899 in 1907 ; and £4,163,148 in 1906.

The imports of fruit into Ireland are considerable, being estimated at £739,753 in 1910 as compared with £778,948 in 1909 ; £699,625 in 1908 ; £687,026 in 1907 ; and £609,523 in 1906. The exports of fruit are comparatively small, although the returns do not adequately represent the extent of the trade.

In the case of jams and preserves the imports amounted to £177,177 in 1910 as compared with £172,339 in 1909 ; £147,963 in 1908 ; £140,823 in 1907 ; and £116,949 in 1906. The exports amounted to £75,230 in 1910 as compared with 61,879 in 1909 ; £56,324 in 1908 ; £56,481 in 1907 ; and £57,205 in 1906.

Among vegetables the largest import is that of onions, of which 241,439 cwts. were imported in 1910 as compared with 219,706 cwts. in 1909 ; 223,488 cwts. in 1908 ; 237,136 cwts. in 1907 ; and 231,492 cwts. in 1906. The chief export of vegetables is that of potatoes, of which 119,870 tons were exported in 1910, valued at £389,578, as compared with 119,785 tons in 1909, valued at £341,886 ; 109,681 tons in 1908, valued at £379,313 ; 100,309 tons in 1907, valued at £394,967 ; and 112,892 tons in 1906, valued at £321,742.

There was a decrease in the quantity of tea and sugar imported in 1910. The quantity of tea imported was returned as 34,024,592 lbs. in 1910 as compared with 34,334,832 lbs. in 1909 ; 32,837,728 lbs. in 1908 ; 32,890,256 lbs. in 1907 ; and 33,186,030 lbs. in 1906 ; the quantity of coffee imported was returned at 1,206,464 lbs. in 1910 as compared with 1,274,784 lbs. in 1909 ; 1,293,152 lbs. in 1908 ; 1,311,148 lbs. in 1907 ; and 1,222,716 lbs. in 1906. The quantity of sugar imported was 2,800,988 cwts. in 1910 as compared with 2,857,832 cwts. in 1909 ; 2,697,955 cwts. in 1908 ; 2,819,987 cwts. in 1907 ; and 2,744,444 cwts. in 1906. The quantities of tea, coffee, and sugar mentioned here are gross weights.

The quantities and estimated values of the imports and exports of manufactured tobacco for the years 1906 to 1909 which appear in this report, differ from those which appeared in previous reports. Recent inquiry shows that the tares which had been assumed for reducing gross to net weights for both imports and exports were too high, and accordingly the quantities as at present estimated are larger than those previously published. A change has also been made in the estimated values of "manufactured" tobacco, as it was found that in previous reports they were inadvertently estimated as inclusive instead of exclusive of duty. The following table shows the revised total quantities and estimated values of the imports and exports of "manufactured" tobacco during each of the years 1904 to 1910 :—

			Imports.		Exports.	
—			Quantity.	Value.	Quantity.	Value.
			lbs.	£	lbs.	£
1904	2,260,541	291,987	4,839,397	302,462
1905	2,250,002	290,625	5,605,281	350,330
1906	2,577,884	332,977	6,173,601	385,850
1907	2,057,708	265,787	6,152,943	384,559
1908	2,774,753	358,406	6,451,888	403,243
1909	2,979,637	384,870	7,292,891	455,806
1910	3,299,448	426,179	7,550,598	471,912

The imports of unmanufactured tobacco amounted to 14,183,918 lbs. in 1910 as compared with 12,977,483 lbs. in 1909 ; 11,374,445 lbs. in 1908 ; 10,622,771 lbs. in 1907 ; and 13,097,789 lbs. in 1906. These quantities of both manufactured and unmanufactured tobacco are net weights.

The total estimated value of wines, spirits, ales, etc., imported showed a continued fall from £1,301,888 in 1906, to £1,191,754 in 1907, to £1,184,864 in 1908, and to £1,108,105 in 1909, but marked a slight increase to £1,161,940 in 1910. The imports of British spirits fell from a value of £77,233 in 1909 to £50,189 in 1910, foreign spirits from £105,941 in 1909 to £98,684 in 1910, while ale and beer rose from £464,921 in 1909 to £489,333 in 1910. The total estimated value of spirits, stout, porter, etc., exported amounted to £4,133,518 in 1910 as compared with £3,658,908 in 1909; £4,176,833 in 1908; £4,289,593 in 1907; and £4,063,554 in 1906. The value of home-made spirits which fell from £2,304,874 in 1907 to £2,195,959 in 1908, and to £1,667,392 in 1909, increased to £1,927,698 in 1910. The value is, however, still below that of any year since 1904, with the exception of 1909. The value of stout and porter exported was estimated at £1,838,397 in 1910 as compared with £1,653,113 in 1909; £1,642,660 in 1908; £1,613,776 in 1907; and £1,509,567 in 1906. The export of aerated waters was estimated at £239,110 in 1910 as compared with £230,016 in 1909; £223,936 in 1908, £252,667 in 1907; and £248,690 in 1906.

Among sundry food stuffs, the chief items are biscuits and confectionery. The imports of biscuits in 1910 were estimated at £106,707 as compared with £100,080 in 1909; £84,741 in 1908; £86,038 in 1907; and £76,233 in 1906. The exports of biscuits are much larger than the imports, and have shown a steady increase from £332,419 in 1906, to £338,290 in 1907; £355,348 in 1908; £388,724 in 1909; and £487,157 in 1910. In the returns under the head of confectionery the imports are much greater than the exports, and increased from £306,109 in 1906 to £339,901 in 1907; £346,049 in 1908; £392,582 in 1909; and £466,155 in 1910. The export of confectionery in 1910 was estimated at £121,792 as compared with £102,489 in 1909; £96,364 in 1908; £96,760 in 1907; and £102,434 in 1906.

In order to furnish the means for comparing (1) the exports of agricultural produce from Ireland with (2) the imports of similar products from colonial and foreign countries into the United Kingdom, a table is presented as Appendix II. showing for the year 1910 the quantities and values of the chief articles of agricultural and horticultural produce imported into the United Kingdom* from British possessions and foreign countries and the corresponding quantities exported from Ireland to Great Britain.

*At present (excepting certain specified articles) the quantities and values of foreign and colonial goods imported are known for the United Kingdom only. Nothing beyond an estimate can be formed as to how far these goods are imports for consumption in Great Britain and how far for consumption in Ireland. For though the import of goods from Great Britain to Ireland is known, it cannot be said how far these goods are foreign or colonial and how far they are British produce. Thus in the case of butter, bacon, and eggs, it is known that the imports from Great Britain into Ireland are of foreign or colonial origin, and a close estimate could therefore be

This table will bring home to Irish producers and exporters the extent of the existing market in Great Britain, and the present strength in that market of the several competitors, while at the same time it shows the very important position which Ireland at present holds in the British market.

Thus in 1910 :—

(1) The value of the Irish export of all classes of live stock was more than three times as large as the value imported into the United Kingdom from all foreign and colonial countries. In this connection it is worthy of note that the export of horses from Ireland amounted to 31,894, and if from this figure is deducted even the total number of horses imported into Ireland, there remains a net export of 27,492 horses. The total number of horses imported into the United Kingdom from all foreign and colonial countries amounted in 1910 to 14,674, of which 7,762 came from Russia. Again in the case of cattle, the number exported from Ireland to Great Britain was 869,181 in 1910, while the total import from foreign and colonial countries into the United Kingdom amounted to 219,561, a fall of about one-third compared with 1909, of which number 138,387 came from the United States and 78,691 from Canada.

(2) The Irish export of butter, £3,584,810, to Great Britain was the second largest in quantity and value ; the export from Denmark into the United Kingdom being first, £10,225,950, and that from Australia third, £3,566,952.

(3) The Irish export of eggs was second largest in total quantity and value, amounting to 6,227,820 gt. hdds., valued at £2,744,133, the imports into the United Kingdom from Russia being the largest, amounting to 9,217,586 gt. hdds., valued at £3,282,194.

(4) The export of poultry from Ireland was much greater than that from any other country into the United Kingdom, Ireland exporting to Great Britain poultry to the value of £927,035, while the highest imports from other countries to the United Kingdom were— from Russia, £303,260 ; France £163,527 ; and United States, £88,144.

(5) As regards bacon and hams, the Irish export, £3,691,981, was third on the list, the largest supplies coming from the United States of America, £6,782,819 (the value in 1909 was £9,009,557), and from Denmark, £6,360,480. The imports from Canada took fourth place at £1,587,869.

made of the net import of these commodities from colonial and foreign countries for consumption in Great Britain and in Ireland respectively. But in the case, for example, of flour much of the very large import from Great Britain into Ireland may be foreign, or it may be British milled flour made from foreign or from British wheat, and with most of the other articles the question is even more difficult. At present, therefore, it is not possible to show the foreign and colonial imports into Great Britain alone, or to furnish an exact comparison between the imports into Great Britain of Irish produce and colonial and foreign produce respectively.

(6) The Irish export of potatoes was the largest quantity imported into Great Britain. The next largest quantities were imported from France and the Channel Islands, but as their trade is chiefly in early potatoes, the value is much greater than that of the Irish export.

(7) As regards oats, the export from Ireland was fourth, Russia, Argentina, and Germany, being the largest exporters to the United Kingdom.

The above cases are sufficient proof of the very strong position which Ireland holds in the markets of Great Britain, and as these are the great open markets of the world for agricultural produce, the figures bring out plainly the wide and representative character of Irish agricultural exports.* This consideration should, therefore, be kept in mind when comparisons are made between the export of particular commodities from Ireland and the corresponding export from any other country, such as the butter export of Denmark, and that of Ireland. Thus, in the case of Denmark, which is frequently compared with Ireland, the total exports of home produce and manufacture to all countries in 1910 amounted to £26,677,054† of which £24,292,015 consisted of agricultural produce. The chief articles of export were butter, £10,038,829, pig produce, £6,384,306; eggs, £1,481,852, horses and foals, £983,402; cattle, £1,871,702. Over three-fourths of the Danish agricultural exports are sent to the United Kingdom. These figures present interesting contrasts with the present Irish agricultural exports, and bring into relief the more highly diversified interests which Ireland has as a country of production and export. Apart from Denmark, it is noteworthy that the country which is and promises to be the most serious competitor with Ireland in the British market, as regards the important articles of butter, eggs, and poultry, is Russia, the export from that country in 1910 amounting to, in butter, 584,040 cwts., valued at £3,045,722; eggs, 9,217,586 gt. hdds., valued at £3,282,194; and poultry, valued at £303,260.

II. RAW MATERIALS.

For the purposes of the broad classification adopted in the summary tables, pp. x. and xi., raw materials include coal, coke, rough and sawn timber, boards and deals, stones, slates, sand, clay, metal ores and other mineral substances, hides, skins, horns and hoofs, wool, bristles, feathers, flax, raw cotton, hemp, jute, tow, waste, seeds, plants and bulbs, ice, &c. The total value of raw materials imported into Ireland in 1910 was estimated approximately at £9,694,926, as compared with £9,420,724 in 1909. The imports consist mainly of coal, wood, flax, and other raw materials of the textile industries. There is also a large import of raw cotton, which is re-exported to Northern Europe.

*Irish export values are f.o.b., and thus do not include cost of transit from Irish Ports to British market centres; whereas foreign and Colonial imports are c.i.f., and thus include transit costs. This difference makes the total foreign values, *e.g.*, of eggs, butter, etc., appear somewhat higher relatively to the Irish than they actually are.

†This and the following figures in this paragraph are taken from the Danish Official Statistics, and are f.o.b. They are, therefore, more strictly comparable with the values of the Irish exports.

The exports in 1910 were estimated at a value of £4,139,044, as compared with £4,658,923 in 1909. Excluding the re-export of raw cotton, these consist mainly of animal produce, such as hides, skins, wool, fats, &c., and, to a lesser extent, of seeds, timber, and other vegetable produce.

The estimated values of the chief imports of raw materials in 1906—1910 were as follows:—

IMPORTS.

	1906.	1907.	1908.	1909.	1910.
	£	£	£	£	£
Coal,	2,370,235	2,837,825	2,826,940	2,577,398	2,778,044
Slates,	92,416	89,363	89,087	144,898	139,904
Timber,	1,465,284	1,357,366	1,185,950	1,360,665	1,841,204
Flax,	1,705,502	1,914,328	1,381,479	1,912,667	1,867,372
Hemp and Jute, Tow and Codilla,	619,261	597,142	548,696	522,847	554,369
Lard, Tallow, &c.	297,540	327,478	330,494	471,265	376,051

The values of the chief exports in the same years were:—

EXPORTS.

	1906.	1907.	1908.	1909.	1910.
	£	£	£	£	£
Timber	314,107	278,716	237,173	245,022	240,851
Hides and Skins,	582,492	524,649	486,754	614,106	610,622
Wool,	610,144	611,813	407,024	747,320	631,197
Lard, Tallow, &c.,	430,134	479,672	494,695	625,978	507,980
Grass Seed,	222,794	349,073	368,866	403,070	371,570

In connection with the above figures it should be stated that the imports of wood and timber, estimated in 1910 at a value of £1,841,204, consist mainly of sawn timber, boards and deals, whereas 90 per cent. of the exported timber is shipped out of the country in the round or rough state—an uneconomic condition of affairs. The large export likewise, of hides and skins, amounting in 1910 to £610,622, should be compared with the imports of leather and leather goods, boots, shoes, saddlery, &c., which approximate a value of £2,400,000 of goods imported. Again, there is a very great export of wool, which amounted in 1910 to the large quantity of 14,091,840 lbs., of an estimated value of £631,197. It is estimated that over three-fourths of the total wool clip in Ireland is exported, and, while the output of the woollen industries in Ireland is also rising, the imports of woollen goods remain largely in excess of exports, though there was an increase in the quantity and value of woollen goods exported in 1910. Thus it is not simply in one branch, but in several—in wood, hides and skins, wool, as well as in various minor exports, such as feathers, kelp, and most of all in her store cattle—that Ireland is exporting the raw materials of industry.

III. MANUFACTURED ARTICLES.

The third division of Irish imports and exports is that of manufactured goods. In 1910 these represented an import the total value of which is estimated at, approximately, £32,000,000, or 49 per cent. of the total value of imports. The export of manufactured goods was estimated, approximately, at £26,000,000, or nearly 40 per cent. of the value of the total export. But to a greater extent than in the case of the imports and exports of either agricultural produce or raw materials the figures indicating the value of manufactured articles must be taken as only approximate in character. For while the existing returns indicate the actual gross weight and quantity of manufactured articles imported and exported, there is great difficulty in determining what is the quality and value of these goods, especially in the case of the more highly differentiated articles. So far as is at present possible, the estimated values have been checked by means of wide and careful inquiries among importers and exporters, through whose courtesy in many cases exact data regarding the gross weight and value of representative consignments of goods have been obtained; but it cannot be too plainly said that until import and export returns are available, which specify the nature, quantity, and value of goods, any figures put forward with regard to the import and export value of manufactured articles can only be regarded as approximate in character.

At the same time it should be clearly understood that the present returns are not arbitrary statements, that they are based on actual figures of weights of goods imported and exported, and on careful inquiries as to value, and that they furnish as close an estimate as is at present possible of the extent and character of this class of Irish trade.

As there is a wide range of manufactured imports and exports, these have been divided, as in the previous Reports, into a number of main groups.

The first and largest group is that of the textiles. The combined imports and exports of manufactured textile goods amounted to a value estimated in 1910 at £35,821,255 as compared with £32,239,308 in 1909, £25,829,080 in 1908, £29,116,674 in 1907, and £27,354,557 in 1906, a sum almost three-fifths of the total value of manufactured imports and exports of Ireland, and which is over one-fourth of the total estimated value of all goods imported and exported to or from Ireland in the year 1910. This fact alone indicates the great importance of the textile group of manufactured goods. The combined textile imports—yarns, piece goods, and made-up goods—amounted in 1910 to an estimated value of £15,730,952, as compared with £14,793,765 in 1909, £12,268,791 in 1908, £13,335,675 in 1907, and £12,935,586 in 1906, while the corresponding textile exports showed an estimated value of £20,090,303 in 1910, £17,445,543 in 1909, £13,560,289 in 1908, £15,780,999 in 1907, and £14,418,971 in 1906.

Distinguishing yarns, thread, rope, cordage, &c., from piece goods and made-up goods, the imports of the former
Yarns, Thread, were in 1910 estimated at £1,882,847 as compared
Rope, etc. with £2,265,312 in 1909, £1,737,381 in 1908, £1,720,178 in 1907, and £1,867,002 in 1906. In this amount the chief items were cotton yarn £578,678; linen yarn, £624,975; woollen yarn, £215,736; and yarns unclassified (which inquiry shows to contain a large amount of woollen yarn), £156,249. There was also an import of thread, estimated at £184,604. The corresponding exports of yarn, thread, rope, twine, cordage, &c., were estimated in 1910 at £2,645,990 as compared with £2,160,556 in 1909, £2,026,946 in 1908, £2,656,906 in 1907, and £2,280,155 in 1906. Of this amount the main items were—linen yarn, £1,596,093; thread, £481,908; rope, cordage, and twine, £453,407.

Much the largest part, however, both of textile imports and exports consists of piece goods, ready-made goods, drapery, and apparel. The imports of these
Piece Goods, were estimated in 1910 at a value of £13,848,105
Drapery, etc. as compared with £12,528,453 in 1909, £10,531,410 in 1908, £11,615,497 in 1907, and the exports at a value of £17,444,313 in 1910 as compared with £15,284,987 in 1909. This increase in the exports is nearly all due to the increased prices of the linen goods exported.

With regard to the imports of piece goods, drapery, apparel, &c., these are of a much more wide and varied character than the exports. The largest import is of drapery and apparel, the combined value of which was estimated at £5,860,083 in 1910 as compared with £5,653,474 in 1909, £4,897,223 in 1908, £5,547,790 in 1907, and £5,117,673 in 1906. The import of cotton goods was greater than in 1909, and was estimated at a value of £4,657,439 as compared with £3,980,367 in 1909, £2,985,704 in 1908, £3,292,542 in 1907, and £3,267,626 in 1906. The imports of woollen goods, including blankets and carpets, were estimated at £1,364,155 in 1910 as compared with £1,182,830 in 1909, £1,129,194 in 1908, £1,130,997 in 1907, and £1,232,552 in 1906. Altogether, apart from drapery and apparel, the quantities of cotton, linen, woollen, and silk goods imported in 1910 were estimated to amount to a sum of, approximately, £7,452,000. In the case of cotton goods imported, a considerable quantity is imported for purposes of further manufacture, and is then re-exported.

In addition to the above classes of finer textile fabrics, there are large imports of coarser stuffs, such as bags and bagging, oilcloth and canvas goods. The total value of textile goods imported in 1910, excluding yarns, &c., is thus estimated, as stated above, to amount to £13,848,105.

In the case of exports, the outstanding feature is the fact that three-fourths of the textile piece goods exported are returned as "linens," but this term in the returns of the portal authorities has a wide significance, and includes "unions" and goods which have only a linen "finish." The estimated value of exports of linen goods amounted to £13,342,998 in 1910 as compared with £11,996,663 in

1909, £8,508,107 in 1908, £9,904,703 in 1907, and £9,133,691 in 1906. The returns show an increase in the value of the exports of woollen goods from £523,033 in 1909 to £617,436 in 1910, but imports are still largely in excess of exports. The total value of the exports of piece and made-up textile goods was estimated in 1910 at £17,444,313.

The second group is that of leather and leather manufactures.

Attention has already been drawn to the very large export of hides and skins, and the still greater import of leather, saddlery, boots and shoes. The exports of hides and skins in 1910, apart from the hides and skins of the live stock exported, amounted to an estimated value of £610,622, as compared with £614,106 in 1909. On the other hand, the import of leather was of a value estimated in 1910 at £462,586, as compared with £599,321 in 1909, £531,933 in 1908, £495,795 in 1907, and £558,366 in 1906, and the imports of boots and shoes were of a value estimated at £1,884,317 in 1910, as compared with £1,791,908 in 1909, £1,750,937 in 1908, £1,728,178 in 1907, and £1,696,294 in 1906. In addition to these sums there are the imports of saddlery, of leather belting, and of an item which is considerable, but which cannot be ascertained from the existing returns, leather and kid gloves. Thus the total imports of leather and of leather manufacturers in 1910 may be estimated at, approximately, £2,400,000.

Large quantities of india-rubber goods are also imported, but it is very difficult to determine the extent and value of this import. It is estimated at £343,985 in 1910, as compared with £340,885 in 1909, £374,096 in 1908, £311,863 in 1907, and £301,005 in 1906.

The third group is that of metals and metal articles, machinery, ships, &c. This group is a very wide class, and

Metal and Metal Manufactures. in gross annual value is next in importance to the textiles. It is estimated that in 1910 the total value of the imports of metals and metal manufactures exceeded £7,000,000, while the exports, which include the export of steam vessels, were estimated at £4,675,941. Among the metal imports, approximately, £2,045,000 consisted of steel, bar and wrought iron, and plates and sheets, imported chiefly into Belfast, while anchors and chains, bolts, rivets, nails and screws, rails, iron chairs, and other railway plant, represent a further import estimated at, approximately, £346,000. Thus the more simple articles of iron and steel manufactures represent a total import in 1910 of £2,712,000. Of the other metals, the import of copper was estimated in 1910 at £117,240; lead at £82,240, brass and bronze at £61,314. With regard to the more highly manufactured classes of goods, the returns show very large imports of hardware utensils and implements, as well as of the heavier iron goods, such as ranges, stoves, meters, pumps, boilers and cylinders. The total value of these and similar articles in 1910 was estimated at £1,677,561. In addition, there are imports of machinery, chiefly agricultural and textile, and railway engines, estimated at £1,387,156, and of cycles and motor cars, estimated at £495,000.

As regards exports, considerable quantities of machinery are shipped from Belfast, while the export of steam vessels is of a very large annual value, estimated in 1910 at, approximately, £3,500,000. Thus there are large individual exports in this class, but as a whole the trade in hardware and metal goods and manufactures stands in contrast to the textile trade. For whereas the value of the textile exports appears even greater than that of the imports there is a very large surplus of metals and metal manufactures imported over what is exported.

Of wooden manufactures also there is a very large import and only a small export. The item of greatest importance among the imports is furniture, though
Wooden Manufactures. there is a difficulty in distinguishing removals of private furniture from what are genuine trade imports and exports. But, taking the total import and total export figures of furniture, the imports exceed the exports by a balance of close on £347,000 as compared with £321,000 in 1909. There is also a wide range of other classes of imported articles wholly or partly of wooden manufacture.

There is a very large annual import into Ireland of paper, stationery, cardboard, books and printed matter,
Paper and Cardboard, etc. estimated for the year 1910 at a total value of £1,107,618 as compared with £1,085,401 in 1909, £1,093,404 in 1908, £1,062,213 in 1907, and £1,002,863 in 1906. The estimated value of imported paper in 1910 was £563,543 ; stationery, £196,677 ; showcards, strawboards, &c., £159,994 ; books, approximately, £90,000. The exports of paper, cardboard, books, &c., in 1910 were estimated at £353,536 as compared with £356,668 in 1909, £357,126 in 1908, £322,939 in 1907, and £318,176 in 1906. The excess of imports over exports in paper, stationery, cardboard, &c., is thus very large, amounting in 1910 to an estimated value of over £754,000, and in 1909 to over £729,000, and is one of the features of Irish trade which deserve particular attention:

Another class of imports which reaches a considerable annual value is that of the manufactures of clay, china, and glass goods. The total value of the imports
Earthenware, China Goods, Glass and Cement. of these goods was estimated in 1910 at £873,047 as compared with £846,531 in 1909, £812,002 in 1908, £884,644 in 1907, and £839,122 in 1906. In 1910 the import of bricks and tiles was estimated at £78,790 ; fire-clay, earthenware, and china goods at £244,479 ; glass, glassware, and bottles at £343,469 ; cement at £206,309. The contrast between the large import of these various classes of goods estimated at £873,047, and the export, estimated at £23,426, is very striking.

A further group of articles of great interest is that of chandlery, including under this heading such goods as
Chandlery candles, soap, starch, matches, oils, paints, polishes, &c. Many of these articles are being manufactured in Ireland, and to some extent exported, but in this

class of goods also there is a very considerable excess of imports over exports. The articles to which attention may be specially directed are as follows:—In 1910, candles imported, £91,939; exported, £6,588; soap imported, £211,278; exported £53,793; starch imported, £59,108; exported, £3,925; paints and varnish imported, £217,495; exported, £22,654; matches imported, £90,616; exported, £1,436. There is also a very large import of oils, chiefly petroleum and paraffin, estimated in 1910 at £1,056,763. Altogether this class of goods represents in 1910 an import of a value estimated at £1,880,990, the exports being estimated at £152,754.

The total value of chemicals, drugs, fertilisers, and dye stuffs imported in 1910 is estimated at £1,209,538, as compared with £1,123,147 in 1909. In the case of drugs and chemicals, goods of this class are frequently sent in small consignments, and the figures submitted in the tables, both of quantity and value, are in all probability considerably lower than the actual quantities and values imported. As regards artificial fertilisers, there is a large import, the estimated value in 1910 being placed at £693,851. There is also a considerable export, estimated in 1910 at £157,155. Dye stuffs imported in 1910 were of a value estimated at £34,923.

The above analysis indicates briefly the extent and character of Irish trade. With regard to the question of the source or “country of origin” of the imports and the final destination of the exports, as stated in previous Reports, the existing returns furnish little information. The trade which passes directly between Ireland and colonial and foreign countries is known, and the more important details as regards this trade at the chief ports in Ireland are presented annually by the Customs and Excise Department in their Statement of the Trade of the United Kingdom. The direct imports of foreign and colonial goods into Ireland during 1910 amounted to a value of £14,522,929, whereas the direct exports amounted to £1,541,314, of which £855,914 consisted of re-exports of foreign and colonial goods. But as regards the indirect colonial and foreign trade of Ireland which passes to and from the Irish ports via those of Great Britain, especially Liverpool and London, there are at present no means of distinguishing this from the colonial and foreign trade of Great Britain. Consequently the total trade of Ireland with countries outside of Great Britain cannot at present be ascertained.

At the same time, after examining carefully the quantities of goods shipped across Channel into and from Ireland, and as a result of inquiries made amongst traders, it is estimated that not more than one-fifth of Irish exports goes to colonial and foreign countries, the other four-fifths remaining in Great Britain; and while it is much more difficult to ascertain what proportion of imports into Ireland are of colonial or foreign origin, it seems probable that at least one-third are articles of such origin, the remaining two-thirds being the produce of Great Britain.

With regard to the total extent of the Irish import and export trade, the imports per head of population, according to the present returns, amount to £14 17s. 9d., and the exports per head of population to £15 1s. 4d.; or if the estimated value of re-exports is excluded, the imports amount to a value of £14 6s. 9d. per head of population, and the exports to £14 10s. 5d. per head of population. It is of interest to compare these amounts with the corresponding figures of the foreign trade of the chief industrial States as shown in the following table:—

STATEMENT showing for the year 1910 or latest available year the estimated Population and the Value per head of Population of the Foreign Trade of the undermentioned countries:—

COUNTRY.	Estimated Population.	Thousand £'s (000's omitted.)		Imports per head of Population.	Exports per head of Population.
		Total Imports for Home Consumption.	Total Exports of Domestic Produce.		
	No.	£	£	£ s. d.	£ s. d.
France	39,300,000	270,394	240,229	6 17 7	6 2 3

* Excluding re-exports estimated at £2,400,000.

As has been pointed out in preceding reports these figures indicate the wide difference which there is in the extent of foreign trade of different countries as measured per head of population. In some States, especially those of wide area and varied climatic conditions, the extent of foreign trade in proportion to the total production of the country is small. Thus it is that the United States of America, with a very great internal trade, has, per head of population, a small foreign

trade ; thus also Germany, with its great agricultural and industrial capacity for production, has a comparatively limited foreign trade per head of population. In all such cases increase or decrease in imports or exports is a very subordinate factor in the industrial progress of the country, and the growth of wealth depends chiefly on internal development and internal trade, and not on the exchange of commodities with other nations. On the other hand, countries which are small in size and with good maritime communication have in general a large foreign trade. Thus it is with Denmark, Belgium, and Holland ; thus also with Ireland.

This consideration has a very direct bearing on the question of the present returns. For the larger the foreign or external trade is in proportion to the internal trade, the greater to such a country is the importance of having as full and accurate as possible a record of this external or foreign trade. The necessary data available on which to form a complete estimate of the total annual production of agriculture and industry in Ireland are not as yet available, but there is evidence sufficient to warrant the conclusion that in proportion to the total annual production and output of the country the external or import and export trade is very large. That being so, it is most important to have as full and reliable a record of this trade as is possible. Such a record is of great industrial and commercial value, and this commercial purpose is the main value of trade statistics such as are submitted in the present Report. As regards the wider inferences of national gain or loss, these require the evidence of much more complete data.

The references in the Consular Reports to Irish trade in 1910 have been brought together as in the Reports
Appendices and for the years 1905, 1906, 1907, 1908, and 1909,
Diagrams and are reprinted in the first Appendix. They represent the references to be found in the Consular Reports published since the last issue of this Report. A table has also been included in this Appendix showing the imports from Ireland into the United States of America, and the exports from the United States to Ireland for the year ending June 30th, 1910. These figures were abstracted from tables 3 and 6 of the Annual Report on Commerce and Navigation of the U.S.A. for the year 1910, which have been recently issued, and which show the trade with Ireland as distinguished from that with England and Scotland. In the second Appendix a table is presented showing the quantities and values of imports of the chief articles of agricultural and horticultural produce into the United Kingdom from British possessions and from foreign countries, and the corresponding exports from Ireland to Great Britain.

Three diagrams are also attached to the Report showing (1) the monthly shipments of fat and store cattle to Great Britain from Ireland, and the monthly arrivals of fat cattle into the United Kingdom from places abroad ; (II.) the monthly export of butter from Ireland and the monthly import of butter from foreign and colonial

countries into the United Kingdom ; and (III.) the monthly export of eggs from Ireland, and the monthly import of eggs from foreign and colonial countries into the United Kingdom.

From the first diagram it will be seen that in 1910 the monthly export of fat cattle from Ireland was the lowest in June and highest in October. The months August to December are those of the heaviest shipments, while April, May, and June are the lowest months. In the store trade the exports from Ireland rose steadily from January to April. In May there was a decline, followed by a rise in June and a further fall in July, and then by a rapid and continuous rise from August to October. The heaviest shipments of stores were in October, the next largest monthly export being in September. The monthly imports of fat cattle from foreign countries are, on the whole, remarkably even throughout the year. If reference is made to the diagrams included in the reports on the years 1907, 1908 and 1909, the striking similarity between the series of curves showing the monthly exports of fat cattle from Ireland from year to year will be noted, the curves rising and falling at the same periods in each year. A similar uniformity exists in the curves showing the monthly exports of store cattle from Ireland. The corresponding curves of monthly imports of fat cattle into the United Kingdom from abroad not only do not show any such uniformity, but are most irregular.

From the second diagram it will be seen that the Irish export of butter in 1910 reached its height in the month of August. The shipments returned for that month amounted to 116,897 cwts. July was the second highest month of output, amounting to 109,574 cwts., June the third month September and October the fourth and fifth. The point of greatest increase in the output was between the months of May and June, the output for May amounting to 55,624 cwts. only, while for June the amount returned was 101,717 cwts. The comparison of the monthly export of butter from Ireland and the monthly import from Denmark is of very practical interest, especially with regard to the monthly average of Irish Creamery Butter prices indicated by the prices line in the diagram.

From the third diagram, showing the exports of eggs, it will be seen that March, April and May were the months of heaviest export. The output, which rose rapidly from January onwards, fell away again after the month of April, and from May onwards there was a steady decline in the output until December, which marks the lowest point in the year. The fact also that Irish supplies are heaviest in the markets in the months when prices are lowest is plainly shewn by a comparison of the lines indicating respectively the movement of prices and the changes in supplies. As in the case of fat and store cattle a remarkable similarity exists in the curves representing the monthly exports of butter and eggs from year to year, and unfortunately in each case the months of largest Irish shipments are usually the months when prices are low, and the months of lowest Irish shipments are the months of highest prices.

In conclusion, I desire to acknowledge gratefully the assistance given by the port and harbour authorities of Ireland, the railway and shipping companies, and by many individual importers and exporters. I am also specially indebted to the Principal of the Statistical Office of the Customs and Excise Department, and to the Comptroller-General of the Commercial, Labour, and Statistical Department of the Board of Trade, for much information which they have kindly afforded.

I am, Sir,

Your obedient Servant,

THOMAS BUTLER,

*Superintendent of Statistics and
Intelligence Branch.*

DEPARTMENT OF AGRICULTURE AND

TECHNICAL INSTRUCTION FOR IRELAND,

DUBLIN, 7th November, 1911.

TOTAL ESTIMATED VALUE OF IMPORTS AND EXPORTS

APPENDIX I.

Extracts relating to Irish Trade with Foreign Countries, taken from the Consular Reports of the undermentioned Countries :—

A.—FOR THE YEAR 1909 (*continued from previous Report*).

EUROPE.

BELGIUM.

The import trade from Ireland during 1909 shows a decline compared with the previous year, but the figures are so small comparatively that it is difficult to make more than a few cursory observations regarding them.

In 1909 the total amounted to 1,335 tons only of a value of £16,400. In 1908 the figures reached 1,799 tons, having a value of £31,720. There was, therefore, a decline in 1909 of 464 tons and £15,320. The principal article of import from Ireland during the year under review was fish, amounting to 82 tons, valued at £7,200, but this is a very serious decline from the figures of 1908. According to the statistics several other trades appear to have fallen off almost entirely. Thus in 1908, 644 tons of grain were imported—in 1909 there were none. 107 tons of copper, valued at £8,520, in 1908 dwindled to 6 tons, valued at £440 in 1909. In fact, with the sole exception of resins and bitumens, amounting to 700 tons and valued at £5,320, there was no single increase in the imports in 1909 worthy of mention. The figures are given in Annex 11.

On the other hand, the exports from Belgium to Ireland showed a considerable increase in value. In 1909 the figures amounted to 31,931 tons, valued at £1,466,560, compared with 33,913 tons, valued at £1,200,600 in 1908, showing a decline in volume of 1,982 tons, but an increase in value of £265,960.

The export trade from Belgium to Ireland is largely made up of two commodities, viz., textiles, amounting to 12,238 tons and valued at £736,480, and flax and other yarns, which reached 5,015 tons, having a value of £601,760. This latter is a large increase over 1908. I would draw attention to the remarks subsequently made respecting the flax trade of Courtrai, which has much to do with the export of goods from Belgium to Ireland.

The figures given in Annex 12 show the position in regard to other exports to Ireland.

I regret that I am unable to give any particulars in this report relative to the import and export trade with Ireland during the first half of 1910, but it is impossible to do so owing to the fact that the statistics necessary to enable a comparison to be made are no longer included in such returns as are available for the first six months of the year.

Annex 11.—IMPORTS into Belgium from Ireland during the Year 1908-09.

FRANCE.

Corsica.—There is no direct trade between Corsica and Ireland.

Marseilles.—The following is an extract from a Return of Exports at Marseilles, showing the Commodities sent direct to Ireland during 1909.

ARTICLES—

Floorings in cement	100	quintals.
Ochre, crushed	10	„
Capers, gherkins, olives	1	„
Seeds for sowing	15	„
Soaps, other than perfumed	18	„
Oils —					
Castor	76	„
Cocoanut (cocoanut butter, &c.)	660	„
Gingelly	4	„

GERMANY.

Hamburg.—It is impossible to furnish statistics of the trade between Hamburg and Ireland, as no special returns of the same are kept at this port.

NORWAY.

Fredriksstad.—In a Return showing the quantity of timber exported from this port to various countries, the amount going to Ireland in 1909 is given as 15,038 cubic metres.

RUSSIA.

Odessa.—There was no trade between Odessa and Ireland during 1909.

Reval.—The trade with Ireland is carried on only with Belfast. The imports consist chiefly of cotton, viz.—809,632 poods=1,305.5 tons.

Libau.—Exports to Ireland consisted of about 1,000 tons of oats to Belfast, and 300 tons of oats, 33,077 cubic feet of aspen logs, and 1½ tons of pigs' bristles to Dublin.

Pernau.—There were 2,492 bags of flaxseed exported to Ireland in 1909, and wood goods, consisting chiefly of sawn timber to the value of £2,045.

Riga and Windau.—The following is an extract showing for the years 1907, 1908, and 1909 the quantity of cotton coming into these ports *via* Belfast and Liverpool.

Article.	Port.	1907.	1908.	1909.	Increase or Decrease in 1909 compared with 1907 - 1908		
		Tons.	Tons.	Tons.	£	Tons.	Tons.

	Windau	2,859	3,558	2,191	178,872	— 668	— 1,367

SPAIN.

Bilbao.—Any imports from Ireland are entered at the customs as coming from the United Kingdom. The only particulars of Irish products known to this Consulate are some 6 tons of seed potatoes imported from County Londonderry, which gave satisfaction to the growers.

Barcelona.—As has been pointed out in many previous reports, it is impossible to obtain information as regards importation from Ireland, as articles from Irish ports are entered at the custom house merely as coming from the United Kingdom.

Seville.—There is an opening for a large trade in butter, most of which now comes from France and Denmark. There is no butter made in this Consular district.

TURKEY.

Aleppo.—It is impossible to determine what amount of trade exists with Ireland, as no line of steamers connects the Syrian coast with Irish ports.

Beirut.—No goods were imported from Ireland in 1909.

AMERICA.

ARGENTINE REPUBLIC.

Rosario.—Statistics of trade with Ireland are not available, as goods imported, consisting chiefly of linen and lace, are included in the custom house returns with the merchandise imported from the United Kingdom, and the exports are also included in the same way.

BRAZIL.

Bahia.—With the exception of a small quantity of Belfast ginger ale and linen goods, there does not appear to be any importation of produce of Ireland as such in this district.

Santa Catharina.—I am unable to state the quantities or exact nature of the Irish goods imported into this State, owing to the fact that they are treated by the custom house as goods imported from the United Kingdom. From private inquiries I find that some linen goods are imported from Belfast.

CHILE.

Valparaíso.—There is no record of any direct trade with Ireland during the past year.

Iquique.—There is no direct trade between Ireland and this port, any importations from that country being classed under the heading of the United Kingdom.

Costa Rica.—There is no direct trade with Ireland, but merchants occasionally order small quantities of Irish goods through Manchester or London houses. Ginger ale, linen, lace, and glacier window paper are the principal articles of Irish manufacture imported.

Hayti and Santo Domingo.—A limited quantity of the finer qualities of linen for shirt fronts, cuffs, table and bed linen, &c., is imported from Ireland, but the demand is very small.

UNITED STATES.

Mobile.—The total value of exports from this port to Ireland during the year 1909 was 102,780 dollars. The value of imports from Ireland during the same period is given as 182 dollars.

Philadelphia.—The total value of imports from Ireland during 1909 was £204,612. The only article specifically mentioned as forming part of these imports is linen goods, of which there were 1,438,668 sq. yards, valued at £43,241.

The exports to Ireland were valued at £68,325.

Portland, Maine.—There is no figure shewing direct trade with Ireland, but it is naturally presumed that Irish linen, &c., came from Ireland, but whether from Belfast, Dublin, or elsewhere it is impossible to say.

Portland, Oregon.—The value of the imports from Ireland amounted to £2,234.

Puget Sound.—Exports to Ireland of wheat cleared from Puget Sound to Queenstown and other Irish ports for orders, amounted to £223,944.

The imports from Ireland were composed of linens, laces, ginger ale, beer and malt liquors.

In a table showing the total imports into Puget Sound, including Seattle, Tacoma, and Port Townsend, during the years 1907-09, the following figures occurred :—

Country.					1907.	1908.	1909.
					£	£	£
Ireland	7,046	2,695	4,121

VENEZUELA.

Caracas.—No figures showing the trade between Ireland and Venezuela, as distinguished from the trade with the United Kingdom, appear in the official statistics published.

B.—FOR THE YEAR 1910.

EUROPE.

FRANCE.

Bordeaux.—No direct imports from Ireland are recorded. The export of wines direct to Ireland in 1910 was 10,098 gallons, as compared with 6,116 gallons in 1909; while the export of brandy was 110 gallons, none having been exported in 1909.

Bayonne.—During 1910 no goods were either imported or exported from Bayonne direct to Ireland, except 125 tons of slates to Waterford.

Honfleur.—There was a direct export to Ireland *via* Southampton of 20 tons spraying machinery, 280 tons rye grass, 110 tons champagne.

ITALY.

Marsala.—There have been no imports from Ireland, and Marsala wine is the only article exported there.

NETHERLANDS.

The following tables show, first the direct imports from Ireland, and, second, the direct exports to Ireland during the years 1908, 1909, and 1910:—

Rotterdam.—56 vessels, with a net tonnage of 45,337 tons, left Rotterdam in 1910 direct for Ireland.

ROUMANIA.

Braila.—Three ships left direct for an Irish port (Belfast) during the year 1910, but no information is to hand as to the nature of the cargoes. There were no arrivals from Irish ports.

Constantza.—No information is obtainable regarding any direct imports from Ireland. Irish linen is little known here, the linen retailed here being of Belgian manufacture. As regards direct exports to Ireland, two British ships cleared from here for Belfast, the one with a cargo of barley and the other with a cargo of petroleum.

SPAIN.

Gijon.—There was no direct trade done with Ireland during the year 1910.

Rivadesella.—No direct trade was done with Ireland in 1910.

Denia.—About 560 tons of raisins were sent to Ireland *via* Liverpool.

TURKEY.

Aleppo.—It is impossible to determine what amount of trade exists with Ireland.

AMERICA.

UNITED STATES.

Baltimore.—The value of the imports from Ireland in 1910 was £10,118, and of exports during the same period £466,070. In both cases the total value only is given, the various classes of goods not being specified.

Brunswick.—There were no direct imports from Ireland. The export to Ireland was 1,359,000 super feet of timber, valued at 21,314 dollars.

Galveston.—Imports from Ireland during the years 1909-10 were :—

	1909.	1910.
	£	£
Ale	2,541	2,609
Felt	—	144
Ginger Ale	—	623
Whiskey	28	—
Other articles	494	117
Total	3,063	3,493

Philadelphia.—The value of goods imported from Ireland during the year 1910 was £77,616. The value of goods exported to Ireland during the same period was £74,960.

Portland.—The values of the Imports from Ireland during the years 1908-10 were as follows :—

1908, £814. 1909, £2,234. 1910, £2,423.

Porto Rico.—All the ginger ale and a portion of the biscuits imported came from Ireland.

Port Townsend.—Imports from Ireland were composed of linens, laces, ginger ale, beer, and malt liquors. The total value of the imports into Puget Sound, including Seattle, Tacoma, and Port Townsend during the years 1908-10 were :—

1908, £2,695. 1909, £4,121. 1910, £4,978.

St. Louis.—A quantity of Irish mackerel is imported direct.

San Francisco.—It is impossible to furnish statistics of the trade with Ireland, as the bulk of the consignments come from New York and are entered at the custom house there.

The principal article imported into this district is linen ; whiskey and ginger ale also enter in small quantities.

The following tables (pp. 119-128) extracted from publications issued by the Bureau of Statistics, Washington, show the imports and exports into and from Ireland from and into the United States during the twelve months ended 30th June, 1910. The tables, however, do not cover the whole trade between Ireland and the United States. Goods manufactured or produced in Ireland, sold to firms in England, and by them exported to the United States, are, as a rule at least, accredited in the reports of the Bureau to England and not to Ireland.
